Data Model Dictionary

Project

Variable	Label	Definition	Type	Mandatory
ProjectID	Project Identifier	System-provided Project identifier	Integer	System-assigned
ProjectName	Project Name	User-given Project name	String	Yes

Variable	Label	Definition	Type	Mandatory
ProjectCrossReferenceID	Project Cross Identifier	The identifier of the Project under another nomenclature system. For example, in a different database or document where other identification for the same Project is used	String	No
ProjectCrossReferenceIDOrigin	Project Cross Identifier Origin	The location/database/document where other identification for the same Project is used	String	No
ProjectCountry	Project Countries	The countries where the Project takes place	Multiple selection	Yes
ProjectFunderOrganization	Project Funder Organization	The organizations providing the funding to conduct the Project	Multiple selection	Yes
ProjectLeadingOrganization	Project Leading Organization	The organization/institution leading the Project execution	Single selection	Yes
ProjectLeader	Project Leader	The person leading the Project. Usually affiliated to the Leading Organization	Single selection	Yes
ProjectOtherOrganization	Project Other Organizations	Other organizations/partners/institutions involved in the execution of the Project (e.g., Laboratories, NGOs, etc.)	Multiple selection	Yes
ProjectType	Project Type	The types of surveillance activities associated with the Project (e.g., Targeted, Scanning, Outbreak Investigation, or Research). If two or more types are involved, then two or more Surveillance Activities are needed so each one receives a single type	Multiple selection	Yes
ProjectPurpose	Project Purpose	Description of the objectives and goals of the Project	String	Yes

Variable	Label	Definition	Type	Mandatory
ProjectGroupSource	Project Group Source	Answer to the question: 'Are new Group Source(s) or from previous Surveillance Activities of interest for the Project?'	Boolean	Yes
ProjectAnimalSource	Project Animal Source	Answer to the question: 'Are new Animal Source(s) or from previous Surveillance Activities of interest for the Project?'	Boolean	Yes
ProjectEnvironmentalSource	Project Environmental Source	Answer to the question: 'Are new Environmental Source(s) or from previous Surveillance Activities of interest for the Project?'	Boolean	Yes
ProjectArthropodSource	Project Arthropod Sources	Answer to the question: 'Are new Arthropod Source(s) or from previous Surveillance Activities of interest for the Project?'	Boolean	Yes
ProjectBiologicalHazard	Biological Hazards	The type(s) of biological health hazard(s) of interest for the Project (e.g., 'Virus', 'Bacteria', 'Protozoa', 'Insecta')	Boolean	Yes
ProjectVirusHazard	Virus	The viruses of interest for the Project. It can be as specific as a clade/variant/etc of a species or as general as 'Virus' (e.g., 'Virus', 'SARS-CoV-2 Omicron variant', 'H5N1 Highly Pathogenic Avian Influenza clade 2.3.3.4b')	Multiple selection	Yes
ProjectBacteriaHazard	Bacteria	The bacteria of interest for the Project. It can be as specific as a strain/serovar/etc of a species or as general as 'Bacteria' (e.g., 'Group-A Streptococcus', 'Mycobacterium bovis')	Multiple selection	Yes
ProjectProtistaHazard	Protista	The Protista of interest for the Project. It can be as	Multiple	Yes

Variable	Label	Definition	Type	Mandatory
		specific as a strain/serovar/etc of a species or as general as 'Protista' (e.g., 'Plasmodium relictum', 'Toxoplasma gondii')	selection	
ProjectFungiHazard	Fungi	The fungi of interest for the Project. It can be as specific as a strain/serovar/etc of a species or as general as 'Fungi' (e.g., 'Pseudogymnoascus destructans', 'Batrachochytrium dendrobatidis')	Multiple selection	Yes
ProjectPrionHazard	Prion	The prion of interest for the Project. It can be as specific as the protein subtype or as general as 'Prion' (e.g., 'Chronic-wasting disease', 'Scrapie', 'Mad cow disease')	Multiple selection	Yes
ProjectTransmissibleTumourHazard	Transmissible Tumour	The transmissible tumour of interest for the Project (e.g., 'Devil facial tumor 1', 'Devil facial tumor 2')	Multiple selection	Yes
ProjectHelminthHazard	Helminth	The Helminth of interest for the Project. It can be as specific as a subspecies or as general as 'Helminth' (e.g., 'Fasciola gigantica')	Multiple selection	Yes
ProjectArthropodHazard	Arthropod	The arthropod of interest for the Project. It can be as specific as a subspecies or as general as 'Arthropod' (e.g., 'Sarcoptes scabiei', 'Rhipicephalus sanguineus')	Multiple selection	Yes
ProjectLeechesHazard	Leeches	The leech species of interest for the Project. It can be as specific as a subspecies or as general as 'Leeches' (e.g., 'Hirudo medicinalis')	Multiple selection	Yes
ProjectChemicalHazard	Chemical Hazards	The type(s) of chemical health hazard(s) of interest for the Project (e.g., 'Heavy Metal', 'Organochlorine	Multiple selection	Yes

Variable	Label	Definition	Type	Mandatory
		Pesticides', 'Cholinesterase-inhibbiting Pesticide', 'Toxins')		
ProjectInsecticideHazard	Insecticides	The groups of insecticide of interest for the Project. It can be as general as 'Insecticide', or as specific as a group of insecticides (e.g., 'Carbamates', 'Pyrethroids')	Multiple selection	Yes
ProjectOrganochlorineHazard	Organochlorines	The Organochlorine compounds of interest for the Project (e.g., 'Chlordane')	Multiple selection	Yes
ProjectCarbamatesHazard	Carbamates	The Carbamate compounds of interest for the Project (e.g., 'Carbaryl')	Multiple selection	Yes
ProjectOrganophosphatesHazard	Organophosphates	The Organophosphate compounds of interest for the Project (e.g., 'Malathion')	Multiple selection	Yes
ProjectPyrethroidsHazard	Pyrethroids	The Pyrethroid compounds of interest for the Project (e.g., 'Cypermethrin')	Multiple selection	Yes
ProjectPyrethroidsHazard	Pyrethroids	The Pyrethroid compounds of interest for the Project (e.g., 'Cypermethrin')	Multiple selection	Yes
ProjectHeavyMetalHazard	Heavy Metal	The heavy metals of interest for the Project. It can be as specific as a chemical form of the heavy metal or as general as the common name of the metal (e.g., 'Lead', 'Methylmercury')	Multiple selection	Yes
ProjectHerbicideHazard	Herbicides	The herbicides of interest for the Project (e.g., 'Atrazina', 'Paraquat')	Multiple selection	Yes
ProjectFungicideHazard	Fungicide	The fungicides of interest for the Project (e.g., 'Captan')	Multiple selection	Yes
ProjectRodenticideHazard	Rodenticide	The rodenticides of interest for the Project (e.g.,	Multiple	Yes

Variable	Label	Definition	Type	Mandatory
		'Warfarin')	selection	
ProjectMycotoxinHazard	Mycotoxin	The micotoxins of interest for the Project (e.g., 'Aflatoxin B1')	Multiple selection	Yes
ProjectBacterialToxinHazard	Bacterial toxin	The bacterial toxins of interest for the Project (e.g., 'Botulinum toxin type C')	Multiple selection	Yes
ProjectPlantToxinHazard	Plant toxin	The plant toxins of interest for the Project (e.g., 'Ricin')	Multiple selection	Yes
ProjectMarineToxinHazard	Marine toxin	The marine toxins of interest for the Project (e.g., 'Domoic acid')	Multiple selection	Yes
ProjectAnimalToxinHazard	Animal toxin	The animal toxins of interest for the Project (e.g., 'spider venom ')	Multiple selection	Yes
ProjectIndustrialChemicalHazard	Industrial chemical	The industrial chemicals of interest for the Project (e.g., 'Asbestos')	Multiple selection	Yes
ProjectForeverChemicalHazard	Forever chemical	The forever chemicals of interest for the Project (e.g., 'PFBS')	Multiple selection	Yes
ProjectThrapeuticAgentHazard	Therapeutic agent	The therapeutic agents of interest for the Project (e.g., 'Diclofenac')	Multiple selection	Yes
ProjectAirPollutantHazard	Air pollutant	The air pollutants of interest for the Project (e.g., 'Ozone')	Multiple selection	Yes
ProjectPhysicalHazard	Physical Hazards	The type(s) of physical health hazard(s) of interest for the Project (e.g., 'Trap', 'Vehicle Collisions', 'Entanglement', 'Burning', 'Electrocution')	Multiple selection	Yes
ProjectTraumaHazard	Trauma	A physical impact threatening the health or survival of animals that are of interest for the Project (e.g., 'Collision', 'Hunting')	Multiple selection	Yes
ProjectCollisionHazard	Collision	The type of collisions that	Multiple	Yes

Variable	Label	Definition	Type	Mandatory
		are of interest for the Project (e.g., 'watercraft collision', 'infrastructure')	selection	
ProjectHuntingHazard	Hunting	The hunting method that are of interest for the Project (e.g., 'trap', 'snare')	Multiple selection	Yes
ProjectRadiationHazard	Radiation	Type of radiation that are of interest for the Project (e.g., 'ionizing radiation')	Multiple selection	Yes
ProjectTemperatureHazard	Temperature	The type of outcome caused by extreme temperatures that are of interest for the Project (e.g., 'heat shock')	Multiple selection	Yes
ProjectPhysiologicalHazard	Physiological Hazards	The type(s) of physiological health problems of interest for the Project (e.g., 'Hypocalcemia', 'Hyperkalemia', 'Amyloid A amyloidosis')	Multiple selection	Yes
ProjectNeoplasiaHazard	Neoplasia	The type of neoplasia not caused or linked to an infectious agent that are of interest for the Project	Multiple selection	Yes
ProjectStartDate	Project Start Date	The starting date of the Project	Date	Yes
ProjectEndDate	Project End Date	The date when the Project is projected/planned to end or officially ended	Date	No
ProjectUrl	Project URLs	URLs of the Project or of the organizations/institutions involved in the Project	String	No

Surveillance Activity

Variable	Label	Definition
SurveillanceActivityID	Surveillance Activity Identifier	System-provided Surveillance Activity identifier

Variable	Label	Definition
SurveillanceActivityCode	Surveillance Activity Code	User-provided Surveillance Activity code
SurveillanceActivityCrossReferenceID	Surveillance Activity Cross Identifier	The identifier of Surveillance Activity in another nomenclature system. For example, different database document where identification for Surveillance Activity is used
SurveillanceActivityCrossReferenceIDOrigin	Surveillance Activity Cross Identifier Origin	The location/database where other identifier for the same Surveillance Activity is used
SurveillanceActivityType	Surveillance Activity Type	The type of surveillance associated with the Surveillance Activity (e.g., Targeted, Scanning, Outbreak Investigation, Research). If two surveillance types are involved, then two Surveillance Activities are needed so each one has a single type of surveillance
SurveillanceActivityGrantName	Surveillance Activity Grant Name	The name of the grant funding the Surveillance Activity. If there is a grant involved, type
SurveillanceActivityGrantNumber	Surveillance Activity Grant Number	The number of the grant funding the Surveillance Activity
SurveillanceActivityLeader	Surveillance Activity Leader	The person leading the Surveillance Activity
SurveillanceActivityLeaderOrganization	Surveillance Activity Leader Organization	The affiliation of the person leading the Surveillance Activity
SurveillanceActivityLeaderOrganizationROR	Surveillance Activity Leader Organization ROR	The ROR of the affiliation of the person leading the Surveillance Activity
SurveillanceActivityOtherIndividuals	Surveillance Activity	Other Individuals

Variable	Label	Definition
	Other Individuals	for the Surveillance
SurveillanceActivitySectorsInvolved	Surveillance Activity Sectors Involved	The environment human, wildlife s involved in the ex the Surveillance
SurveillanceActivityOrganizationsInvolved	Surveillance Activity Organizations Involved	Organizations/pa institutions invol execution of the Surveillance Acti Laboratories, NG
SurveillanceActivityCountry	Country or Countries Included in the Surveillance Activity	The countries wh Surveillance Acti place
SurveillanceActivityBiologicalHazard	Biological Hazards	The type(s) of bi health hazard(s) o for the Surveillan (e.g., 'Virus', 'Bac 'Protozoa', 'Insect
SurveillanceActivityVirusHazard	Virus	The viruses of in the Surveillance can be as specific clade/variant/etc species or as gene 'Virus' (e.g., 'Virus CoV-2 Omicron 'H5N1 Highly Pa Avian Influenza c 2.3.3.4b')
SurveillanceActivityBacteriaHazard	Bacteria	The bacteria of in the Project. It can specific as a strain/serovar/etc species or as gene 'Bacteria' (e.g., 'C Streptococcus', 'Mycobacterium
SurveillanceActivityProtozoaHazard	Protozoa	The protozoa of i the Surveillance can be as specific strain/serovar/etc species or as gene 'Protozoa' (e.g., 'Plasmodium reli 'Toxoplasma gon

Variable	Label	Definition
SurveillanceActivityFungiHazard	Fungi	The fungi of interest for the Surveillance Activity. It can be as specific as a subspecies (e.g., 'Pseudogymnoascus destructans', 'Batrachochytrium dendrobatidis')
SurveillanceActivityPrionHazard	Prion	The prion of interest for the Surveillance Project. It can be as specific as the protein subunit (e.g., 'Prion protein', 'Chronic-wasting disease', 'Scrapie', 'Mad cow')
SurveillanceActivityTransmissibleTumourHazard	Transmissible Tumour	The transmissible tumour of interest for the Surveillance Activity (e.g., 'Devil tumor 1', 'Devil tumor 2')
SurveillanceActivityNematodaHazard	Nematode	The nematode of interest for the Surveillance Activity. It can be as specific as a subspecies (e.g., 'Nematode', 'Canis', 'Canis')
SurveillanceActivityPlatyhelminthHazard	Platyhelminth	The platyhelminth of interest for the Surveillance Activity. It can be as specific as a subspecies (e.g., 'Fasciola gigantica', 'Fasciola hepatica')
SurveillanceActivityArthropodHazard	Arthropod	The arthropod of interest for the Surveillance Activity. It can be as specific as a subspecies or as general as 'Arthropod' (e.g., 'Rhipicephalus sanguineus')
SurveillanceActivityChemicalHazard	Chemical Hazards	The type(s) of chemical health hazard(s) of interest for the Surveillance Activity (e.g., 'Heavy Metals', 'Organochlorine pesticides', 'Cholinesterase-inhibitors')

Variable	Label	Definition
SurveillanceActivityHeavyMetalHazard	Heavy Metal	Pesticide', 'Toxin' The heavy metal for the Surveillance Activity. It can be as specific as a chemical name of the heavy metal or as general as the common name of the metal ('Lead', 'Methylmercury')
SurveillanceActivityOrganochlorinePesticidesHazard	Organochlorine Pesticides	The organochlorine pesticides of interest for the Surveillance Activity. It can be as specific as a chemical name of an organochlorine pesticide or as general as 'Organochlorine Pesticide' (e.g., 'DDT', 'Lindane')
SurveillanceActivityCholinesteraseInhibbitingPesticideHazard	Cholinesterase-inhibbiting Pesticide	The cholinesterase-inhibbiting pesticides of interest for the Surveillance Activity. It can be as specific as a type of cholinesterase-inhibbiting pesticide or as general as 'Cholinesterase-inhibbiting Pesticide' (e.g., 'Diisopropyl fluorophosphate', 'Malathion')
SurveillanceActivityToxinsHazard	Toxins	The toxin of interest for the Surveillance Activity. It can be as specific as a toxin subtype or as general as 'Toxin' (e.g., 'Clostridium botulinum toxin type A', 'Tetanus toxin')
SurveillanceActivityPhysicalHazard	Physical Hazards	The type(s) of physical health hazard(s) of interest for the Surveillance Activity (e.g., 'Trap', 'Vehicle collisions', 'Entanglements', 'Burning', 'Electrocution')
SurveillanceActivityPhysiologicalHazard	Physiological Hazards	The type(s) of physiological health problems of interest for the Surveillance Activity (e.g., 'Hypocalcemia', 'Hyperkalemia', 'Leukopenia', 'Amyloidosis')

Variable	Label	Definition
SurveillanceActivityTaxaTargeted	Taxa Targeted	Taxa of interest for Surveillance Activities. It is possible to select taxonomy levels 'Mammalia', 'Chordata', 'Insecta', etc. to include no particular species targeted. The answer refers to previous Sources (Carcasses or Specimens from previous Surveillance Activities) and not if both are included in the Surveillance Activity.
SurveillanceActivityPurpose	Surveillance Activity Purpose	Description of the objectives and goals of the Surveillance Activity.
SurveillanceActivityMethods	Surveillance Activity Methods	Description of the methods used to complete the Surveillance Activity: transect, citizen monitoring, ranger patrols, and team putbreak interviews, mosquito trapping, reporting body counts, indigenous community reporting findings, processed carcasses.
SurveillanceActivityNewFieldVisits	Surveillance Activity New Field Visits	Answer to the question 'Does the Surveillance Activity involve New Visits?'
SurveillanceActivityNewFieldVisitCodeStructure	Surveillance Activity New Field Visit Code Structure	Description of the structure of the codes used for New Field Visits.
SurveillanceActivityNewFieldVisitOtherAttributes	Surveillance Activity New Field Visit Other Attributes	Answer to the question 'Does the Surveillance Activity involve other properties of New Field Activities not included in the default Field Visit model?'
SurveillanceActivityNewFieldVisitListDefinitionOtherAttributes	Surveillance Activity New Field Visit Definition Other Attributes	Description of other attributes of the Visit not included in the default model. Provide a

Variable	Label	Definition
		the name of the a and their definition
SurveillanceActivityNewLocationsCodeStructure	Surveillance Activity Location Code Structure	Description of the of the codes used Location
LocationsNumberKnown	Surveillance Activity Locations Number Know	Answer to the qu the number of Lo included in the S Activity know a p
SurveillanceActivityLocationsNumber	Surveillance Activity Locations Number	The number of L included in the S Activity
SurveillanceActivityLocationSpatialPolygons	Surveillance Activity Location Spatial Polygons	Answer to the qu the polygons of L entered in the dat external file cont spatial data?'
SurveillanceActivityEventCodeStructure	Surveillance Activity Event Code Structure	Description of the of the codes used Events
SurveillanceActivityActiveCollection	Surveillance Activity Active Collection	Answer to the qu Source Records o through an active strategy (e.g., can mosquito traps, p transect, mist net observation perio exploration, etc.)
SurveillanceActivityCollectionCodeStructure	Surveillance Activity Collection Code Structure	Description of the of the codes used Collections
SurveillanceActivityGroupSourcesIncluded	Surveillance Activity Includes Group Sources	Answer to the qu 'Does the Surveil Activity include animals at a group (e.g., herd, pack, animal in a cage, collected or from Surveillance Acti
SurveillanceActivityAnimalSourcesIncluded	Surveillance Activity Includes Animal Sources	Answer to the qu 'Does the Surveil Activity include individual anima

Variable	Label	Definition
SurveillanceActivityEnvironmentalSourcesIncluded	Surveillance Activity includes Environmental Sources	collected or from Surveillance Activities?
SurveillanceActivityArthropodSourcesIncluded	Surveillance Activity Includes Arthropod Sources	Answer to the question 'Does the Surveillance Activity include Arthropod Sources (e.g., sites where CO2 be placed to collect mosquitoes) to be collected or from previous Surveillance Activities?'
SurveillanceActivityPreviousSpecimensAnySourceType	Surveillance Activity Previous Specimens Any Source Type	Answer to the question 'Does the Surveillance Activity include Specimens of any type obtained under a Surveillance Activity?'
SurveillanceActivityNewSpecimensAnySourceType	Surveillance Activity New Specimens Any Source Type	Answer to the question 'Does the Surveillance Activity include new Specimens of any type?'
SurveillanceActivityNewPooledSpecimens	Surveillance Activity New Pooled Specimens	Answer to the question 'Does the Surveillance Activity involve new Pooled Specimens?'
SurveillanceActivityNewPooledSpecimenCodeStructure	Surveillance Activity New Pooled Specimens Code Structure	Description of the codes used for the newly created Pooled Specimens
SurveillanceActivityNewDiagnostics	Surveillance Activity New Diagnostics	Answer to the question 'Does the Surveillance Activity involve Diagnostics?'
SurveillanceActivityNewDiagnosticsCodeStructure	Surveillance Activity New Diagnostics Code	Description of the codes used for the newly created Diagnostics

Variable	Label	Definition
	Structure	new Diagnostics
SurveillanceActivityNewDiagnosticProducts	Surveillance Activity New Diagnostic Products	Answer to the question 'Does the Surveillance Activity involve the use of new Diagnostic Products?'
SurveillanceActivityLaboratoriesIncluded	Surveillance Activity Laboratories Included	Answer to the question 'Are there any laboratories participating some of the Surveillance Activities?'
SurveillanceActivityLaboratories	Surveillance Activity Participating Laboratories	The laboratories participating in a Surveillance Activity in the Surveillance Activity
SurveillanceActivityIACUCNeeded	Surveillance Activity IACUC Needed	Answer to the question 'Does an IACUC need to be established to conduct the Surveillance Activity?'
SurveillanceActivityOrganizationProvidingIACUC	Surveillance Activity Organization Providing IACUC	The organization providing the IACUC approval and methodology of the Surveillance Activity
SurveillanceActivityIACUCCode	Surveillance Activity IACUC Code	The code of the IACUC approving the methodology of the Surveillance Activity
SurveillanceActivityDataOwner	Surveillance Activity Data Owner	The person or organization that owns the Surveillance Activity data
SurveillanceActivityDataManager	Surveillance Activity Data Manager	The person responsible for managing the Surveillance Activity data
SurveillanceActivityOtherSurveillanceActivityAssociated	Surveillance Activity Other Surveillance Activities or Datasets Associated	Answer to the question 'Are there other Surveillance Activities or other datasets associated with the Surveillance Activity? (e.g., if the current Surveillance Activity is a Surveillance Activity Specimens collected from other associated Surveillance Objectives, the full set of events, ranger patrol (beyond the Surveillance events) belong to

Variable	Label	Definition
		XXXX of the pro Y')
SurveillanceActivityOtherSurveillanceActivityAssociatedCode	Surveillance Activity Associated Surveillance Activities Codes	The Codes of oth Surveillance Acti datasets associate current Surveillan Activity
SurveillanceActivityReasonOtherSurveillanceActivityAssociated	Reason other Surveillance Activities or Datasets Are Associated	Describe why oth Surveillance Acti associated with th Surveillance Acti the current Surve Activity uses Spe collected as part Surveillance Acti the health Events patrols conducted protected Z')
SurveillanceActivityRelevantUrl	Surveillance Activity URLs	URLs of the Surv Activity, associat Surveillance Acti organizations lea Surveillance Acti
SurveillanceActivityPublication	Surveillance Activity Publications	Publication refer associated with th Surveillance Acti
SurveillanceActivityStartDate	Surveillance Activity Start Date	The date the Surv Activity officially
SurveillanceActivityEndDate	Surveillance Activity End Date	The date the Surv Activity is projec or officially ende

Surveillance Activity - Group Source

Variable	Label
SurveillanceActivityTargetedSpecies	Group Sour Species of Interest

Variable	Label
SurveillanceActivitySpeciesIdentificationMethod	Group Source Species Identification Method
SurveillanceActivitySpeciesIdentificationMethodReferences	Group Source Species Identification Method References
SurveillanceActivityTargetedHazardType	Group Source Targeted Hazard Type
SurveillanceActivityTargetedHazardName	Group Source Targeted Hazard Name
SurveillanceActivityTargetedHazardBySpecies	Group Source Targeted Hazard By Species
SurveillanceActivityFieldGroupSourceIncluded	Group Source Records From the Field

Variable	Label
SurveillanceActivityFieldGroupSourceCodeStructure	New Group Source Code Structure
SurveillanceActivityFieldObservedOnlyGroupSource	Group Source Records From Observed-Only Groups
SurveillanceActivityCaptureFieldGroupSource	Group Source Records From Captured Groups
SurveillanceActivityOneTimeCaptureFieldGroupSource	Group Source Records From

Variable	Label
	Non-marked Groups
SurveillanceActivityReleaseCaptureFieldGroupSource	Group Source Records From Non-marked Released Groups
SurveillanceActivityMarkReleaseRecaptureFieldGroupSource	Group Source Records From Previously Marked and then Released Groups
SurveillanceActivityReleaseCaptureMarkRecaptureFieldGroupSource	Group Source Records From Released Captured Marked and Recaptured Groups

Variable	Label
SurveillanceActivityCaptureMarkRecaptureFieldGroupSource	Group Source Records From Captured Marked and Recaptured Groups
SurveillanceActivityCaptiveFieldGroupSources	Group Source Records From Captive Groups
SurveillanceActivityCaptivityCategoryBySpecies	Group Source Captivity Status Per Group
SurveillanceActivityCaptiveFacilityBySpecies	Group Source Captivity Facility Per Group
SurveillanceActivityLocationCaptiveFacilityBySpecies	Group Source Location of Captivity Facilities Per

Variable	Label
	Group
SurveillanceActivitySourceInclusionCriteriaAny	Any Group Source Inclusion Criteria
SurveillanceActivitySourceInclusionCriteriaBySpecies	Group Source Inclusion Criteria By Species
SurveillanceActivitySourceExclusionCriteriaAny	Any Group Source Exclusion Criteria
SurveillanceActivitySourceExclusionCriteriaBySpecies	Group Source Exclusion Criteria By Species
SurveillanceActivityNumberSourcesKnown	Group Source Number

Variable	Label
	Known
SurveillanceActivityNumberSources	Group Source Number
SurveillanceActivityGroupSourceMembersInclusionCriteriaAny	Any Inclusion Criteria Group Source Members
SurveillanceActivityGroupSourceMembersInclusionCriteriaByGroup	Group Source Members Inclusion Criteria By Group
SurveillanceActivityGroupSourceMembersExclusionCriteriaAny	Any Group Source Members Exclusion Criteria
SurveillanceActivityGroupSourceMembersExclusionCriteriaByGroup	Group Source Members Exclusion Criteria By Group

Variable	Label
SurveillanceActivitySourceFollowedOverTime	Group Source Followed Over Time
SurveillanceActivitySourceFollowedOverTimeFrequency	Group Source Followed Over Time Frequency
SurveillanceActivitySourceIdentification	Group Source Identification
SurveillanceActivitySourceIdentificationMethodByGroup	Group Source Identification Method
SurveillanceActivitySourceIdentificationMethodReferencesByGroup	Group Source Identification Method References
SurveillanceActivityIdentifiedSourceInPreviousSurveillanceActivity	Group Source Records from Groups Identified in Previous Surveillance Activities

Variable	Label
SurveillanceActivityIdentifiedSourceOriginProjectCode	Project Code Group Source Identified in Previous Surveillance Activities
SurveillanceActivityIdentifiedSourcePreviousSurveillanceActivityCode	Surveillance Activity Code Group Source Identified in Previous Surveillance Activities
SurveillanceActivityGroupSourceRecordCodeStructure	Group Source Record Code Structure
SurveillanceActivityGroupSourceRecordHealthy	Group Source Include Healthy Animals
SurveillanceActivityGroupSourceRecordHealthyDescription	Description Group Source Include Healthy Animals

Variable	Label
SurveillanceActivityGroupSourceRecordSick	Group Source Include Sick Animals
SurveillanceActivityGroupSourceRecordSickDescription	Description Group Source Include Sick Animals
SurveillanceActivityGroupSourceRecordInjured	Group Source Include Inj Animals
SurveillanceActivityGroupSourceRecordInjuredDescription	Description Group Source Include Inj Animals
SurveillanceActivityGroupSourceRecordDead	Group Source Include De Animals
SurveillanceActivityGroupSourceRecordDeadDescription	Description Group Source Include De Animals
SurveillanceActivityGroupSourceRecordUnknown	Group Source Include Animals Unknown Health Stat
SurveillanceActivityGroupSourceRecordUnknownDescription	Description Group Source Include Unknown Health Stat Animals
SurveillanceActivityGroupSourceRecordInclusionCriteriaAny	Any Group

Variable	Label
	Source Record Inclusion Criteria
SurveillanceActivityGroupSourceRecordInclusionCriteria	Group Source Record Inclusion Criteria
SurveillanceActivityGroupSourceRecordExclusionCriteriaAny	Any Group Source Record Exclusion Criteria
SurveillanceActivityGroupSourceRecordExclusionCriteria	Group Source Record Exclusion Criteria
SurveillanceActivityGroupSourceRecordNumberBySpeciesCaptivityKnown	Number Group Source Record Per Species Captivity Known
SurveillanceActivityGroupSourceRecordNumberBySpeciesCaptivity	Number Group Source Record Per Species Captivity
SurveillanceActivityGroupSourceRecordClustering	Group Source Records Clustering
SurveillanceActivityGroupSourceRecordClusteringDescription	Group Source Records Cluster Description

Variable	Label
SurveillanceActivitySourceOrCarcassOrStoredCarcassDiagnostic	Group Source Diagnostic
SurveillanceActivitySourceOrCarcassOrStoredCarcassDiagnosticProtocols	Group Source Carcasses Diagnostic Protocols
SurveillanceActivitySourceOrCarcassOrStoredCarcassDiagnosticProtocolsReferences	Group Source Diagnostic Protocol References
SurveillanceActivitySourceOrCarcassOrStoredCarcassDiagnosticsOutput	Group Source Diagnostic Output
SurveillanceActivitySourceOrCarcassOrStoredCarcassDiagnosticDiagnosticProducts	Group Source Diagnostic Products
SurveillanceActivityGroupSourceSpecimens	Group Source Specimens
SurveillanceActivityFieldGroupSourceSpecimens	Field Group Source Specimens

Variable	Label
SurveillanceActivityFieldGroupSourceSpecimenTypes	Field Group Source Specimen Types
SurveillanceActivityFieldGroupSourceSpecimenCollectionMethod	Field Group Source Specimen Collection Method
SurveillanceActivityFieldGroupSourceSpecimenCollectionMethodReferences	Field Group Source Specimen Collection Method References
SurveillanceActivityFieldGroupSourceSpecimenFieldStorage	Field Group Source Specimen Field Storage
SurveillanceActivityNumberFieldGroupSourceSpecimensPerSpeciesCaptivityKnown	Number Field Group Source Specimens Per Species Captivity Known
SurveillanceActivityNumberFieldGroupSourceSpecimensPerSpeciesCaptivity	Number Field Group Source Specimens Per Species

Variable	Label
	Captivity
SurveillanceActivityNumberFieldSpecimensPerGroupSourceKnown	Number Field Specimens Group Source Known
SurveillanceActivityNumberFieldSpecimensPerGroupSource	Number Field Specimens Group Source
SurveillanceActivityNewSpecimenCodeStructure	Field Group Source Specimen Code Structure
SurveillanceActivityNewSpecimenInclusionCriteriaByTypeAny	Any New Field Group Source Specimen Inclusion Criteria

Variable	Label
SurveillanceActivityNewSpecimenInclusionCriteriaByType	New Field Group Source Specimen Inclusion Criteria
SurveillanceActivityNewSpecimenExclusionCriteriaByTypeAny	Any New Field Group Source Specimen Exclusion Criteria
SurveillanceActivityNewSpecimenExclusionCriteriaByType	New Field Group Source Specimen Exclusion Criteria
SurveillanceActivityNewSpecimenLabStorage	New Field Specimen Facility Storage
SurveillanceActivityNumberNewGroupSourceSpecimensByTypeSpeciesKnown	Number Field Group Source Specimens By Type Species Known
SurveillanceActivityNumberNewGroupSourceSpecimensByTypeSpecies	Group Source Specimens By Type Species

Variable	Label
	Number of Specimens Type Specimens
SurveillanceActivityStoredGroupSourceSpecimens	Stored Group Source Specimens
SurveillanceActivityStoredGroupSourceSpecimenTypes	Stored Group Source Specimen Types
SurveillanceActivityStoredGroupSourceSpecimensProjectOrigin	Stored Specimens Project Origin Code
SurveillanceActivityStoredGroupSourceSpecimensSurveillanceActivity	Stored Specimens Previous Surveillance Activity Code
SurveillanceActivityStoredGroupSourceSpecimenInclusionCriteriaByTypeAny	Any Stored Group Source Specimen Inclusion Criteria
SurveillanceActivityStoredGroupSourceSpecimenInclusionCriteriaByType	Stored Group

Variable	Label
	Source Record Inclusion Criteria
SurveillanceActivityStoredGroupSourceSpecimenExclusionCriteriaByTypeAny	Any Stored Group Source Specimen Exclusion Criteria
SurveillanceActivityStoredGroupSourceSpecimenExclusionCriteriaByType	Stored Group Source Record Exclusion Criteria
SurveillanceActivityNumberStoredGroupSourceSpecimensByTypeSpeciesKnown	Number Stored Group Source Specimens By Type Species Known
SurveillanceActivityNumberStoredGroupSourceSpecimensByTypeSpecies	Number Stored Group Source Specimens By Type Species
SurveillanceActivityNumberGroupSourceSpecimensByTypeSpeciesKnown	Number Group Source Specimens By Type Species Known

Variable	Label
SurveillanceActivityNumberGroupSourceSpecimensByTypeSpecies	Number Group Source Specimens By Type Species
SurveillanceActivityGroupSourceSpecimensIncludesParasitesVectors	Group Source Specimens Includes Parasites or Vectors
SurveillanceActivityGroupSourceSpecimenPooling	Group Source Specimen Pooling
SurveillanceActivityGroupSourceSpecimenPoolingStrategy	Group Source Specimen Pooling Strategy

Variable	Label
SurveillanceActivitySpecimenNewDiagnostics	Surveillance Activity Group Source Diagnostics
SurveillanceActivitySpecimenNewDiagnosticsProtocolByHazardSpecimenTypeSpecies	Group Source Protocol Diagnostics
SurveillanceActivitySpecimenNewDiagnosticsProtocolByHazardSpecimenTypeSpeciesReferences	Group Source

Variable	Label
	Protocol Diagnostics References
SurveillanceActivitySpecimenNewDiagnosticsProtocolsOutputs	Group Sour Diagnostic Outputs
SurveillanceActivitySpecimenNewDiagnosticsProtocolsProducts	Group Sour Diagnostic Products
SurveillanceActivityFieldVisitList	Field Visit Group Sour Records
SurveillanceActivityFieldVisitOtherAttributes	Field Visit Group Sour Records Ot Attributes

Variable	Label
SurveillanceActivityFieldVisitListDefinitionOtherAttributes	Field Visit Group Source Records Definition Other Attributes
SurveillanceActivityFieldVisitNumberKnown	Number Field Visits Known
SurveillanceActivityFieldVisitNumber	Number Field Visits
SurveillanceActivityFieldVisitNumberLocationsKnown	Number Locations Surveyed Field Visits Known
SurveillanceActivityFieldVisitNumberLocations	Number Locations Field Visits

Variable	Label
SurveillanceActivityFieldVisitNumberEventsKnown	Number Events Known Per Field Visit
SurveillanceActivityFieldVisitNumberEvents	Number Events Per Field Visit
SurveillanceActivityFieldVisitNumberCollectionKnown	Number Collections Known Per Field Visit
SurveillanceActivityFieldVisitNumberCollection	Number Collections Per Field Visit
SurveillanceActivityFieldVisitNumberGroupSourceRecordsKnown	Number Group Source Records Known Per Field Visit

Variable	Label
SurveillanceActivityFieldVisitNumberGroupSourceRecords	Number Group Source Records Per Field Visit
SurveillanceActivityFieldVisitNumberGroupSpecimensKnown	Number Group Specimens Field Visit Known
SurveillanceActivityFieldVisitNumberGroupSpecimens	Number Group Specimens Field Visit
SurveillanceActivityLocationUnitofInterest	Location Unit of Interest
SurveillanceActivityLocationDefinition	Location Definition
SurveillanceActivityLocationPreviousSurveillanceActivities	Location Previous Surveillance Activities

Variable	Label
SurveillanceActivityLocationPreviousProjectCodes	Location Previous Project Codes
SurveillanceActivityLocationPreviousSurveillanceActivityCodes	Location Previous Surveillance Activity Codes
SurveillanceActivityLocationList	Location List Group Source Records
SurveillanceActivityLocationSpatialFileProvided	Location Group Source Record Spatial File Provided
SurveillanceActivityLocationPolygonProjection	Location Group Source Record Polygon Projection

Variable	Label
SurveillanceActivityLocationOtherAttributes	Location Group Source Record Other Attributes
SurveillanceActivityLocationListDefinitionOtherAttributes	Location Group Source Record Definition Other Attributes
SurveillanceActivityLocationActiveCollection	Active Collection of Group Source Records at Locations
SurveillanceActivityLocationNumberPlannedSurveysKnown	Number Surveys Performed

Variable	Label
	Location Known
SurveillanceActivityLocationNumberPlannedSurveys	Number Surveys Per Location
SurveillanceActivityLocationNumberEventsKnown	Number Events Per Location Known
SurveillanceActivityLocationNumberEvents	Number Events Per Location
SurveillanceActivityLocationNumberCollectionKnown	Number Collections Location Known

Variable	Label
SurveillanceActivityLocationNumberCollection	Number Collections Location
SurveillanceActivityLocationNumberSourceRecordsKnown	Number Gr Source Rec Per Location Known
SurveillanceActivityLocationNumberSourceRecords	Number Gr Source Rec Per Location
SurveillanceActivityLocationNumberSourceRecordsPerSurveyKnown	Number Gr Source Rec Per Location Per Survey Known
SurveillanceActivityLocationNumberSourceRecordsPerSurvey	Number Gr Source Rec Per Location Per Survey
SurveillanceActivityLocationNumberSpecimensKnown	Number Gr Source Specimens

Variable					Label
					Location Known
SurveillanceActivityLocationNumberSpecimens					Number Gr Source Specimens Location
SurveillanceActivityLocationNumberSpecimensPerSurveyKnown					Number Gr Source Specimens Location Po Survey Kno
SurveillanceActivityLocationNumberSpecimensPerSurvey					Number Gr Source Specimens Location Po Survey
SurveillanceActivityLocationClustering					Location Clustering
SurveillanceActivityEventUnitofInterest					Event Unit Interest

Variable	Label
SurveillanceActivityNewGroupSourceEventDefinition	Event Definition
SurveillanceActivityEventIncludesHealthyGroupSources	Event Includes Healthy Group Sources
SurveillanceActivityEventIncludesSickGroupSources	Event Includes Sick Group Sources
SurveillanceActivityEventIncludesInjuredGroupSources	Event Includes Injured Group Sources
SurveillanceActivityEventIncludesDeadGroupSources	Event Includes Dead Group Sources
SurveillanceActivityNewGroupSourceEventIncludesManyGroupSources	Event Includes Several Group Sources
SurveillanceActivityNewGroupSourceEventIncludesAnimalSources	Event Includes Animal

Variable	Label
	Sources
SurveillanceActivityNewGroupSourceEventIncludeEnvironmentalSources	Event Include Environmental Sources
SurveillanceActivityNewGroupSourceEventIncludeArthropodSources	Event Include Arthropod Sources
SurveillanceActivityEventOtherAttributes	Event Other Attributes
SurveillanceActivityEventListDefinitionOtherAttributes	Event Definition Other Attributes

Surveillance Activity - Group Source Records Clustering

Variable	Label	D
SurveillanceActivityGroupSourceRecordClustering	Surveillance Activity Group Source Record Clustering	Answer ques Gro Rec Surv Acti clus

Variable	Label	Description
SurveillanceActivityGroupSourceRecordSpatialClustering	Surveillance Activity Group Source Record Spatial Clustering	Answers questions about the group of surveillance activity records that are spatially clustered.
SurveillanceActivityGroupSourceRecordSpatialNestedClustering	Surveillance Activity Group Source Record Spatial Nested Clustering	Answers questions about the group of surveillance activity records that are spatially clustered, nested within the group of surveillance activity records that are spatially clustered.
SurveillanceActivityGroupSourceSpatialNumberLevelsNestedClusters	Surveillance Activity Group Source Spatial Number Levels Nested Clusters	The number of levels of nested clusters of surveillance activity records that are spatially clustered.
SurveillanceActivityGroupSourceSpatialNestedClusterLevelsRepresent	Surveillance Activity Group Source Spatial Nested Cluster Levels Represent	Describes what levels of nested clusters of surveillance activity records are represented.

Variable	Label	Description
	Clusters Represent	Records for each level of the hierarchy are grouped with
	Surveillance Activity Group Source Spatial Number Categories Per Nested Cluster Level	Describe the number of categories for each nested group. Records are categorized by level, containing areas 2, and containing grid 2 coordinates.
	Surveillance Activity Group Source Records Per Spatial Nested Cluster Category Known	Answers questions about the number of records for each spatial cluster group. Records are known, opposed, and the Surveillance Activity device
	Surveillance Activity Group Source Records Per Spatial Nested Cluster Category	Describe the source of each of the nested spatial

Variable	Label	Description
	Cluster Category	group of records Group of records Record example Group of records Source of records Record grid the number of records number of records grid ten records of 3 records Source of records Record
SurveillanceActivityGroupSourceSpatialNestedClustersOtherAttributes	Surveillance Activity Group Source Spatial Nested Clusters Other Attributes	Answers questions about spatial clusters group of records Group of records Record containing properties including the number of records model
SurveillanceActivityGroupSourceSpatialNestedClustersListDefinitionOtherAttributes	Surveillance Activity Group Source Spatial Nested Clusters List Definition Other Attributes	Describes the number of attributes spatial clusters group of records Group of records Record including the number of records model Provided with of the attributes their definitions
SurveillanceActivityGroupSourceRecordSpatialNonNestedClustering	Surveillance Activity Group Source Record Spatial Non	Answers questions about Group of records Record Surveillance Activity

Variable	Label	Description
	Nested Clustering	spatial clustering non-grouped example Group Source Records grouped by cities by zip
SurveillanceActivityGroupSourceSpatialNumberNonNestedClusters	Surveillance Activity Group Source Spatial Number Non Nested Clustering	The number of non-spatial groups Group Source Records
SurveillanceActivityGroupSourceSpatialNonNestedClusterRepresent	Surveillance Activity Group Source Spatial Non Nested Clusters Represent	Description: what spatial nesting Group Source Records For clustering grid clusters fenced area
SurveillanceActivityGroupSourceSpatialNumberCategoriesPerNonNestedCluster	Surveillance Activity Group Source Spatial Number Categories Per Non Nested Cluster	Description: the number of Categories each nested group Group Records example clusters contained cells contained fenced area
SurveillanceActivityGroupSourceRecordsPerSpatialNonNestedClusterCategoryKnown	Surveillance	Answer

Variable	Label	Description
	Activity Group Source Records Per Spatial Number Categories Per Non Nested Cluster	ques the n Gro Rec each of e non- clus grou Gro Rec know opp opp and the Surv Acti deve
SurveillanceActivityGroupSourceRecordsPerSpatialNonNestedClusterCategory	Surveillance Activity Group Source Records Per Spatial Non Nested Cluster Category	The of G Sou Rec each of e non- clus grou Gro Rec
SurveillanceActivityGroupSourceSpatialNonNestedClustersOtherAttributes	Surveillance Activity Group Source Spatial NonNested Clusters Other Attributes	Ans ques spat nest grou Gro Sou Rec cont prop incl the c mod
SurveillanceActivityGroupSourceSpatialNonNestedClustersListDefinitionOtherAttributes	Surveillance Activity Group Source Spatial NonNested Clusters	Des the c attri spat nest grou Gro

Variable	Label	Description
	Definition Other Attributes	Records include the model provided with of the attributes their definition
SurveillanceActivityGroupSourceSpatialClustersFileProvided	Surveillance Activity Group Source Spatial Clusters File Provided	Answers questions file the nested nested type spatial group Group Record their correlation category provided file?
SurveillanceActivityGroupSourceSpatialClustersSpatialProjection	Surveillance Activity Group Source Spatial Clusters Spatial Projection	The projection the nested non-cluster group Group Record provided the file?
SurveillanceActivityGroupSourceRecordTemporalClustering	Surveillance Activity Group Source Record Temporal Clustering	Answers questions Group Record Surveillance Activity temporal cluster nested nested cluster example Group

Variable	Label	Description
SurveillanceActivityGroupSourceRecordTemporalNestedClustering	Surveillance Activity Group Source Record Temporal Nested Clustering	Source Record temporal nested Clustering for Group Record temporal nested Clustering The number of levels of temporal nested Clustering for Group Record temporal nested Clustering are defined by year
SurveillanceActivityGroupSourceNumberTemporalNestedClustersLevels	Surveillance Activity Group Source Number Temporal Nested Clusters Levels	The number of levels of temporal nested Clustering for Group Record temporal nested Clustering
SurveillanceActivityGroupSourceTemporalNestedClusterLevelsRepresent	Surveillance Activity Group Source Temporal Nested Clusters Represent	Description of what levels of temporal nested Clustering for Group Record temporal nested Clustering are represented by the 2 variables
SurveillanceActivityGroupSourceTemporalNumberCategoriesPerNestedClusterLevel	Surveillance Activity Group Source Temporal Number Categories Per Nested Cluster Level	Description of the number of categories for each level of temporal nested Clustering for Group Record temporal nested Clustering

Variable					Label	Description
SurveillanceActivityGroupSourceRecordsPerTemporalNestedClusterLevel					Temporal Number Categories Per Nested Cluster Level	temporal number of categories per nested cluster level
						temporal number of categories per nested cluster level
						temporal number of categories per nested cluster level
SurveillanceActivityGroupSourceRecordsPerTemporalNestedClusterCategoryKnown					Surveillance Activity Group Source Records Per Temporal Nested Cluster Category	Surveillance Activity Group Source Records Per Temporal Nested Cluster Category
						Surveillance Activity Group Source Records Per Temporal Nested Cluster Category
						Surveillance Activity Group Source Records Per Temporal Nested Cluster Category
SurveillanceActivityGroupSourcePerTemporalNestedClusterCategory					Surveillance Activity Group Source per Temporal Nested Cluster Category	Surveillance Activity Group Source per Temporal Nested Cluster Category
						Surveillance Activity Group Source per Temporal Nested Cluster Category
						Surveillance Activity Group Source per Temporal Nested Cluster Category

Variable	Label	Description
		includes the group source during the 3 months for a group source record season time between visits neighbor with visits is 2
SurveillanceActivityGroupSourceTemporalNestedClustersOtherAttributes	Surveillance Activity Group Source Temporal Nested Clusters Other Attributes	Answers questions temporal nested group source record contains properties included the model
SurveillanceActivityGroupSourceTemporalNestedClustersListDefinitionOtherAttributes	Surveillance Activity Group Source Temporal Nested Clusters Definition Other Attributes	Describes the attributes temporal nested group source record included the model provided with of the attributes their definition
SurveillanceActivityGroupSourceRecordTemporalNonNestedClustering	Surveillance Activity Group Source	Answers questions Group Source Record

Variable	Label	Description
	Record Temporal NonNested Clustering	Surv Acti temp clus non- grou exan Grou Rec clus date year by d
SurveillanceActivityGroupSourceNumberTemporalNonNestedClusters	Surveillance Activity Group Source Number Temporal NonNested Clusters	The of te non- clus grou Grou Rec
SurveillanceActivityGroupSourceTemporalNonNestedClustersRepresent	Surveillance Activity Group Source Temporal NonNested Clusters Represent	Des wha temp nest grou Grou Rec For Clus date year clus deca
SurveillanceActivityGroupSourceTemporalNumberCategoriesPerNonNestedCluster	Surveillance Activity Group Source Temporal Number Categories Per NonNested Cluster	Des the n Cate each nest grou Grou Rec exan of th cont opti deca cont year

Variable	Label	Description
SurveillanceActivityGroupSourcePerTemporalNonNestedClusterCategoryKnown	Surveillance Activity Group Source per Temporal NonNested Cluster Category	Answers questions about the number of groups recorded for each surveillance activity group, non-nested clusters grouped by surveillance activity group, recorded for known opposite-sex and the surveillance activity development
SurveillanceActivityGroupSourcePerTemporalNonNestedClusterCategory	Surveillance Activity Group Source per Temporal NonNested Cluster Category	Describes the temporal source recorded for each of the nested temporal clusters grouped by surveillance activity group, recorded for example, grouped by surveillance activity group, recorded for each year of the year 365, source recorded year, decade
SurveillanceActivityGroupSourceTemporalNonNestedClustersOtherAttributes	Surveillance Activity Group Source Temporal NonNested Clusters Other Attributes	Answers questions about temporal nested clusters grouped by surveillance activity group, recorded for other attributes

Variable					Label	Description
SurveillanceActivityGroupSourceTemporalNonNestedClustersListDefinitionOtherAttributes					SurveillanceActivityGroupSourceTemporalNonNestedClustersListDefinitionOtherAttributes	Includes the model definition for the nested group record including the model provided with the attribute definition.
						Answers questions like: file the nested group record with their corresponding category provided file?
SurveillanceActivityGroupSourceTemporalClustersFileProvided					SurveillanceActivityGroupSourceTemporalClustersFileProvided	nest type temporal cluster group record their corresponding category provided file?

Surveillance Activity - Animal Source

Variable		Label	Description
SurveillanceActivityTargetedSpecies		Animal Source of Interest	

Variable	Label
SurveillanceActivitySpeciesIdentificationMethod	Animal Source Species Identification Method
SurveillanceActivitySpeciesIdentificationMethodReferences	Animal Source Species Identification Method References
SurveillanceActivityTargetedHazardType	Animal Source Targeted Hazard Type
SurveillanceActivityTargetedHazardName	Animal Source Targeted Hazard Name
SurveillanceActivityTargetedHazardBySpecies	Animal Source Targeted Hazard By Species
SurveillanceActivityFieldAnimalSourceIncluded	Animal Source Records From the Field

Variable	Label
SurveillanceActivityFieldAnimalSourceCodeStructure	New Animal Source Code Structure
SurveillanceActivityFieldObservedOnlyAnimalSource	Animal Source Records From Observed-Only Animals
SurveillanceActivityCaptureFieldAnimalSource	Animal Source Records From Captured Animals
SurveillanceActivityOneTimeCaptureFieldAnimalSource	Animal Source Records From Non-marked Animals

Variable	Label
SurveillanceActivityReleaseCaptureFieldAnimalSource	Animal Source Records From Non-marked Released Animals
SurveillanceActivityMarkReleaseRecaptureFieldAnimalSource	Animal Source Records From Previously Marked and then Released Animals
SurveillanceActivityReleaseCaptureMarkRecaptureFieldAnimalSource	Animal Source Records From Released Captured Marked and Recaptured Animals
SurveillanceActivityCaptureMarkRecaptureFieldAnimalSource	Animal Source Records From Captured Marked and Recaptured

Variable	Label
	Animals
SurveillanceActivityCaptiveFieldAnimalSources	Animal Sources Records From Captive Animals
SurveillanceActivityCaptivityCategoryBySpecies	Animal Sources Captivity Status Per Species
SurveillanceActivityCaptiveFacilityBySpecies	Animal Sources Captivity Facility Per Species
SurveillanceActivityLocationCaptiveFacilityBySpecies	Animal Sources Location of Captivity Facilities Per Species

Variable	Label
SurveillanceActivitySourceInclusionCriteriaAny	Any Animal Source Inclusion Criteria
SurveillanceActivitySourceInclusionCriteriaBySpecies	Animal Source Inclusion Criteria By Species
SurveillanceActivitySourceExclusionCriteriaAny	Any Animal Source Exclusion Criteria
SurveillanceActivitySourceExclusionCriteriaBySpecies	Animal Source Exclusion Criteria By Species
SurveillanceActivityNumberSourcesKnown	Animal Source Number Known
SurveillanceActivityNumberSources	Animal Source Number

Variable	Label
SurveillanceActivitySourceFollowedOverTime	Animal Source Followed Over Time
SurveillanceActivitySourceFollowedOverTimeFrequencyBySpecies	Animal Source Followed Over Time Frequency By Species
SurveillanceActivitySourceIdentification	Animal Source Identification
SurveillanceActivitySourceIdentificationMethodBySpecies	Animal Source Identification Method By Species
SurveillanceActivitySourceIdentificationMethodReferencesBySpecies	Animal Source Identification Method References By Species
SurveillanceActivityFieldAnimalSourceCarcassFieldNecropsy	Animal Source Carcass Field Necropsy
SurveillanceActivityFieldAnimalSourceCarcassFieldNecropsyProtocolBySpecies	Animal Source Carcass Field Necropsy Protocol By Species

Variable	Label
	Field Necropsy Carcass Protocol
SurveillanceActivityFieldAnimalSourceCarcassFieldNecropsyProtocolReferences	Animal Source Field Necropsy Carcass Protocol
SurveillanceActivityFieldAnimalSourceCarcassCollected	Animal Source Carcass Collected
SurveillanceActivityFieldAnimalSourceCarcassCollectedInclusionCriteriaAny	Any Animal Source Carcass Collected Inclusion Criteria
SurveillanceActivityFieldAnimalSourceCarcassCollectedInclusionCriteria	Animal Source Carcass Collected Inclusion Criteria
SurveillanceActivityFieldAnimalSourceCarcassCollectedExclusionCriteriaAny	Any Animal Source Carcass Collected Exclusion Criteria

Variable	Label
SurveillanceActivityFieldAnimalSourceCarcassCollectedExclusionCriteria	Animal Source Carcass Collected Exclusion Criteria
SurveillanceActivityFieldNumberFieldCarcassSpeciesKnown	Animal Source Carcass Number per Species Known
SurveillanceActivityFieldNumberFieldCarcassSpecies	Animal Source Carcass Number per Species
SurveillanceActivityFieldAnimalSourceCarcassFieldStorage	Field Animal Source Carcass Field Storage
SurveillanceActivityFieldAnimalSourceCarcassLabStorage	Field Animal Source Carcass Facility Storage
SurveillanceActivityStoredCarcassIncluded	Animal Source Stored Carcass Included
SurveillanceActivityStoredCarcassOriginProjectCode	Stored

Variable	Label
	Carcasses Project Origin Code
SurveillanceActivityStoredCarcassPreviousSurveillanceActivityCode	Stored Carcasses Previous Surveillance Activity Code
SurveillanceActivityStoredCarcassInclusionCriteriaAny	Any Stored Carcass Inclusion Criteria
SurveillanceActivityStoredCarcassInclusionCriteria	Store Carca Inclusion Criteria
SurveillanceActivityStoredCarcassExclusionCriteriaAny	Any Stored Carcass Exclusion Criteria
SurveillanceActivityStoredCarcassExclusionCriteria	Store Carca Exclusion Criteria

Variable	Label
SurveillanceActivityStoredCarcassNumberSpeciesKnown	Store Carcass Number per Species Known
SurveillanceActivityStoredCarcassNumberSpecies	Store Carcass Number per Species
SurveillanceActivityIdentifiedSourceInPreviousSurveillanceActivity	Animal Sources Records from Animals Identified in Previous Surveillance Activities
SurveillanceActivityIdentifiedSourceOriginProjectCode	Project Codes Animal Sources Identified in Previous Surveillance Activities
SurveillanceActivityIdentifiedSourcePreviousSurveillanceActivityCode	Surveillance Activity Codes Animal Sources Identified in Previous Surveillance Activities
SurveillanceActivityCarcassLabNecropsy	Carcass Laboratory Necropsy

Variable	Label
SurveillanceActivityCarcassLabNecropsyProtocol	Carcass Laboratory Necropsy Protocols
SurveillanceActivityCarcassLabNecropsyProtocolReferences	Carcass Laboratory Necropsy Protocols References
SurveillanceActivityCarcassLabNecropsyNumberBySpeciesCaptivity	Carcass Laboratory Necropsy Number By Species and Captivity
SurveillanceActivityAnimalSourceRecordCodeStructure	Animal Source Record Code Structure
SurveillanceActivityAnimalSourceRecordHealthy	Surveillance Activity Category Include Healthy Animal Sources

Variable					Label
SurveillanceActivityAnimalSourceRecordHealthy	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordSick	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordSickDescription	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordInjured	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordInjuredDescription	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordDead	Description	Surveillance	Activity	Animal	Sources
SurveillanceActivityAnimalSourceRecordDeadDescription	Description	Surveillance	Activity	Animal	Sources

Variable	Label
SurveillanceActivityUnknownAnimalSourceRecord	Surveillance Activity Include Animal Sources Unknown Health Status
SurveillanceActivityUnknownAnimalSourceRecordDescription	Description Surveillance Activity Unknown Health Status Animal Sources
SurveillanceActivityAnimalSourceRecordInclusionCriteriaAny	Any Animal Source Record Inclusion Criteria
SurveillanceActivityAnimalSourceRecordInclusionCriteria	Animal Source Record Inclusion Criteria
SurveillanceActivityAnimalSourceRecordExclusionCriteriaAny	Any Animal Source Record Exclusion Criteria
SurveillanceActivityAnimalSourceRecordExclusionCriteria	Animal Source Record Exclusion Criteria
SurveillanceActivityAnimalSourceRecordNumberBySpeciesCaptivityKnown	Number Animal Sources

Variable	Label
	Records Per Species Captivity Known
SurveillanceActivityAnimalSourceRecordNumberBySpeciesCaptivity	Number Species Captivity
SurveillanceActivityAnimalSourceRecordNumberByAnimalSourceKnown	Number Records Per Animal Source Known
SurveillanceActivityAnimalSourceRecordNumberByAnimalSource	Number Records Per Animal Source
SurveillanceActivityAnimalSourceRecordVaccinated	Animal Source Record Vaccinated
SurveillanceActivityAnimalSourceRecordVaccinatedAgainst	Animal Source Record Vaccinated Against
SurveillanceActivityFieldAnimalSourceRecordNumberBySpeciesCaptivity	Number Field Animal Source Records Per Species Captivity
SurveillanceActivitySourceRecordClustering	Animal Source Records Clustering
SurveillanceActivitySourceRecordClusteringDescription	Animal Source Record Clustering Description

Variable	Label
	Records Cluster Description

Variable	Label	Definition
SurveillanceActivityAnimalSourceRecordSpatialNonNestedClustering	Surveillance Activity Animal Source Record Spatial Non Nested Clustering	the definition of the surveillance activity animal source record spatial non nested clustering is as follows: Animal Source Record Spatial Non Nested Clustering is a type of surveillance activity animal source record spatial non nested clustering. It is defined as a surveillance activity animal source record spatial non nested clustering that is not nested within a surveillance activity animal source record spatial non nested clustering.
SurveillanceActivityAnimalSourceSpatialNumberNonNestedClusters	Surveillance Activity Animal Source Spatial Number Non Nested Clustering	The definition of the surveillance activity animal source spatial number non nested clusters is as follows: Surveillance Activity Animal Source Spatial Number Non Nested Clustering is a type of surveillance activity animal source spatial number non nested clusters. It is defined as a surveillance activity animal source spatial number non nested clusters that is not nested within a surveillance activity animal source spatial number non nested clusters.
SurveillanceActivityAnimalSourceSpatialNonNestedClusterRepresent	Surveillance Activity Animal Source Spatial Non Nested Clusters Represent	The definition of the surveillance activity animal source spatial non nested clusters represent is as follows: Surveillance Activity Animal Source Spatial Non Nested Clusters Represent is a type of surveillance activity animal source spatial non nested clusters represent. It is defined as a surveillance activity animal source spatial non nested clusters represent that is not nested within a surveillance activity animal source spatial non nested clusters represent.
SurveillanceActivityAnimalSourceSpatialNumberCategoriesPerNonNestedCluster	Surveillance Activity Animal Source Spatial Number Categories Per Non Nested Cluster	The definition of the surveillance activity animal source spatial number categories per non nested cluster is as follows: Surveillance Activity Animal Source Spatial Number Categories Per Non Nested Cluster is a type of surveillance activity animal source spatial number categories per non nested cluster. It is defined as a surveillance activity animal source spatial number categories per non nested cluster that is not nested within a surveillance activity animal source spatial number categories per non nested cluster.

Variable	Label	
	Per Non Nested Cluster	Source Records excluded from consideration for each of the 1000 simulated scenarios
SurveillanceActivityAnimalSourceRecordsPerSpatialNonNestedClusterCategoryKnown	Surveillance Activity Animal Source Records Per Spatial Non Nested Cluster Categories Per Non Nested Cluster	Animal Source Records for each of the non-clustered animals in the surveillance activity. The number of categories is determined by the number of non-clustered animals in the surveillance activity. The number of categories is determined by the number of non-clustered animals in the surveillance activity.
SurveillanceActivityAnimalSourceRecordsPerSpatialNonNestedClusterCategory	Surveillance Activity Animal Source Records Per Spatial Non Nested Cluster Category	The number of source records for each of the non-clustered animals in the surveillance activity. The number of categories is determined by the number of non-clustered animals in the surveillance activity.
SurveillanceActivityAnimalSourceSpatialNonNestedClustersOtherAttributes	Surveillance Activity Animal Source Spatial Non Nested Clusters	Animal Source Records for each of the non-clustered animals in the surveillance activity. The number of categories is determined by the number of non-clustered animals in the surveillance activity.

Variable	Label	Description
	Other Attributes	Recovery, contact, processing, income, the model
	Surveillance Activity Animal Source Spatial NonNested Clusters List Definition Other Attributes	Definition, the attributes, spatial, nested, Animal, Animal, Source, Recovery, income, the model, Processing, with, of, attributes, the definition
SurveillanceActivityAnimalSourceSpatialClustersFileProvided	Surveillance Activity Animal Source Spatial Clusters File Provided	Animal, questionnaire, file, the, nested
	Surveillance Activity Animal Source Spatial Clusters Spatial Projection	The, processing, the, nested, non, clusters, Animal, Animal, Source

Variable	Label	Interpretation
		Record of the presence of the pathogen in the sample.
		Animal source of the pathogen.
		Source of the pathogen.
		Record of the pathogen.
		Surveillance activity.
SurveillanceActivityAnimalSourceRecordTemporalClustering	SurveillanceActivityAnimalSourceRecordTemporalClustering	Animal source of the pathogen, recorded in the surveillance activity.
		Record of the pathogen.
		Surveillance activity.
		Animal source of the pathogen.
		Source of the pathogen.
		Record of the pathogen.
		Surveillance activity.
SurveillanceActivityAnimalSourceRecordTemporalNestedClustering	SurveillanceActivityAnimalSourceRecordTemporalNestedClustering	Animal source of the pathogen, recorded in the surveillance activity, nested by temporal clustering.
		Record of the pathogen.
		Surveillance activity.
		Animal source of the pathogen.

		Record of the pathogen.
		Surveillance activity.
SurveillanceActivityAnimalSourceNumberTemporalNestedClustersLevels	SurveillanceActivityAnimalSourceNumberTemporalNestedClustersLevels	Animal source of the pathogen, recorded in the surveillance activity, nested by temporal clustering, with levels of surveillance activity.
		Record of the pathogen.
		Surveillance activity.
		Animal source of the pathogen.
		Source of the pathogen.
		Record of the pathogen.
		Surveillance activity.

Variable							Label	Interpretation
SurveillanceActivityAnimalSourceTemporalNestedClusterLevelsRepresent							Levels	Represent the number of levels in the nested cluster structure.
								Define the number of levels in the nested cluster structure.
							Surveillance	Define the number of surveillance activities.
							Activity	Define the number of surveillance activities.
							Animal	Define the number of surveillance activities.
							Source	Define the number of surveillance activities.
							Temporal	Define the number of surveillance activities.
SurveillanceActivityAnimalSourceTemporalNumberCategoriesPerNestedClusterLevel							Nested	Define the number of surveillance activities.
							Clusters	Define the number of surveillance activities.
							Represent	Define the number of surveillance activities.
								Define the number of surveillance activities.
							Surveillance	Define the number of surveillance activities.
							Activity	Define the number of surveillance activities.
							Animal	Define the number of surveillance activities.
SurveillanceActivityAnimalSourceRecordsPerTemporalNestedClusterCategoryKnown							Source	Define the number of surveillance activities.
							Temporal	Define the number of surveillance activities.
							Number	Define the number of surveillance activities.
							Categories	Define the number of surveillance activities.
							Per Nested	Define the number of surveillance activities.
							Cluster	Define the number of surveillance activities.
							Level	Define the number of surveillance activities.
SurveillanceActivityAnimalSourceRecordsPerTemporalNestedClusterCategoryKnown								Define the number of surveillance activities.
							Surveillance	Define the number of surveillance activities.
							Activity	Define the number of surveillance activities.
							Animal	Define the number of surveillance activities.
							Source	Define the number of surveillance activities.
							Records Per	Define the number of surveillance activities.
							Temporal	Define the number of surveillance activities.
SurveillanceActivityAnimalSourceRecordsPerTemporalNestedClusterCategoryKnown							Nested	Define the number of surveillance activities.
							Cluster	Define the number of surveillance activities.
							Category	Define the number of surveillance activities.
								Define the number of surveillance activities.
							Surveillance	Define the number of surveillance activities.
							Activity	Define the number of surveillance activities.
							Animal	Define the number of surveillance activities.

Variable	Label	Description
SurveillanceActivityAnimalSourcePerTemporalNestedClusterCategory	Surveillance Activity Animal Source per Temporal Nested Cluster Category	known as the Surveillance Activity Animal Source per Temporal Nested Cluster Category. This variable is used to track the surveillance activity of animals across different temporal nested clusters. It is a categorical variable with 10 possible values: 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10. The values represent different surveillance activities, such as: 1. Surveillance Activity Animal Source per Temporal Nested Cluster Category 2. Surveillance Activity Animal Source per Temporal Nested Cluster Category 3. Surveillance Activity Animal Source per Temporal Nested Cluster Category 4. Surveillance Activity Animal Source per Temporal Nested Cluster Category 5. Surveillance Activity Animal Source per Temporal Nested Cluster Category 6. Surveillance Activity Animal Source per Temporal Nested Cluster Category 7. Surveillance Activity Animal Source per Temporal Nested Cluster Category 8. Surveillance Activity Animal Source per Temporal Nested Cluster Category 9. Surveillance Activity Animal Source per Temporal Nested Cluster Category 10. Surveillance Activity Animal Source per Temporal Nested Cluster Category
SurveillanceActivityAnimalSourceTemporalNestedClustersOtherAttributes	Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes	known as the Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes. This variable is used to track the surveillance activity of animals across different temporal nested clusters. It is a categorical variable with 10 possible values: 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10. The values represent different surveillance activities, such as: 1. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 2. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 3. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 4. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 5. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 6. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 7. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 8. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 9. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes 10. Surveillance Activity Animal Source Temporal Nested Clusters Other Attributes

Surveillance Activity - Location Clustering

Variable			Label	Defini
SurveillanceActivityLocationClustering			Surveillance Activity Location	Answer question Location

Variable	Label	Definition
SurveillanceActivityLocationSpatialClustering	Clustering	the Surveillance Activity clustered
	Surveillance Activity Location Spatial Clustering	Answer question Location the Surveillance Activity spatially clustered nested or nested clusters) example Location represent markets markets clustered cities
	Surveillance Activity Location Spatial Nested Clustering	Answer question Location the Surveillance Activity spatially clustered nested le For exam Location markets markets clustered within ci
SurveillanceActivityLocationSpatialNumberLevelsNestedClusters	Surveillance Activity Location Spatial Number Levels Nested Clusters	The num of spatial nested cl levels grouping Location
SurveillanceActivityLocationSpatialNestedClusterLevelsRepresent	Surveillance Activity Location Spatial	Descript what each level of spatial nested cl

Variable	Label	Definition
	Nested Clusters Represent	grouping Location For example, Level 1 areas Level 2 areas are grid cells within an area
SurveillanceActivityLocationSpatialNumberCategoriesPerNestedClusterLevel	Surveillance Activity Location Spatial Number Categories Per Nested Cluster Level	Description of the number of categories per nested cluster level. For example, Level 1 contains 2 areas; in Level 2, area 1 contains 2 grid cells and area 2 contains 2 grid cells.
SurveillanceActivityLocationPerSpatialNestedClusterCategoryKnown	Surveillance Activity Locations Per Spatial Nested Cluster Category	Answer to the question: 'the number of locations within each category per spatial nested cluster grouping?'. Location known?' opposite opportunity and added to the Surveillance Activity develops
SurveillanceActivityLocationPerSpatialNestedClusterCategory	Surveillance Activity Location Per Spatial Nested Cluster Category	Description of the Location per each category per nested spatial clusters grouping Location example

Variable	Label	Definition
		field activity for area include 3 Location grid cell total of 9 Location grid cell. time frame between visit to a cell with single visit an area in days
SurveillanceActivityLocationSpatialNestedClustersOtherAttributes	Surveillance Activity Location Spatial Nested Clusters Other Attributes	Answer question spatial nested clusters grouping Location contain other properties included the data model?'
SurveillanceActivityLocationSpatialNestedClustersListDefinitionOtherAttributes	Surveillance Activity Location Spatial Nested Clusters Definition Other Attributes	Describe the other attribute spatial nested clusters grouping Location included the data model. Provide with the of the attribute their definition
SurveillanceActivityLocationSpatialNonNestedClustering	Surveillance Activity Location Spatial Non Nested Clustering	Answer question Location the Surveillance Activity spatially clustered

Variable	Label	Definition
		non-nested groups? example Location represents markets clustered cities and by fenology
SurveillanceActivityLocationSpatialNumberNonNestedClusters	Surveillance Activity Location Spatial Number Non Nested Clustering	The number of non-nested spatial clustering Location
SurveillanceActivityLocationSpatialNonNestedClusterRepresent	Surveillance Activity Location Spatial Non Nested Clusters Represent	Description: what each spatial nested clustering Location For example cluster 1 grid cells; cluster 2 fenology areas
SurveillanceActivityLocationSpatialNumberCategoriesPerNonNestedCluster	Surveillance Activity Location Spatial Number Categories Per Non Nested Cluster	Description: the number of categories each non-nested clustering Location example cluster 1 contains cells; cluster 2 contains fenology areas
SurveillanceActivityLocationPerSpatialNonNestedClusterCategoryKnown	Surveillance Activity Location Per Spatial Number Categories Per Non	Answer to question: the number of each spatial category of each non-nested

Variable	Label	Definition
	Nested Cluster	cluster grouping Location known?' opposite opportun and added the Surveillance Activity develops
SurveillanceActivityLocationPerSpatialNonNestedClusterCategory	Surveillance Activity Location Per Spatial Non Nested Cluster Category	The number of Locations per each category each spatial non-nested cluster the grouping Location
SurveillanceActivityLocationSpatialNonNestedClustersOtherAttributes	Surveillance Activity Location Spatial NonNested Clusters Other Attributes	Answer question spatial non nested clustering Location contain other properties included the data model?' attribute
SurveillanceActivityLocationSpatialNonNestedClustersListDefinitionOtherAttributes	Surveillance Activity Location Spatial NonNested Clusters Definition Other Attributes	Description of the other attributes spatial non nested clustering Location included the data model. Provide with the of the attributes their definition
SurveillanceActivityLocationSpatialClustersFileProvided	Surveillance Activity	Answer question

Variable	Label	Definition
	Location Spatial Clusters File Provided	file containing the list of nested, nested, clustered, or types of spatial clustering grouping Location their corresponding categories provided in file?
SurveillanceActivityLocationSpatialClustersSpatialProjection	Surveillance Activity Location Spatial Clusters Spatial Projection	The spatial projection of the spatially nested and non-nested clusters grouping Location provided in the file
SurveillanceActivityLocationTemporalClustering	Surveillance Activity Location Temporal Clustering	Answer to question: Location the Surveillance Activity temporal clustering nested or nested clusters) example Location clustered decade a month or the years
SurveillanceActivityLocationTemporalNestedClustering	Surveillance Activity Location Temporal Nested Clustering	Answer to question: Location the Surveillance Activity temporal clustering nested level For example

Variable	Label	Definition
		Location of the surveillance activity, clustered by month and then months are clustered by year
SurveillanceActivityLocationNumberTemporalNestedClustersLevels	Surveillance Activity Location Number Temporal Nested Clusters Levels	The number of levels of temporal nested clustering Location
SurveillanceActivityLocationTemporalNestedClusterLevelsRepresent	Surveillance Activity Location Temporal Nested Clusters Represent	Description of what each level of temporal nested clustering Location For example Level 1 is seasons 1 and 2 are months within seasons
SurveillanceActivityLocationTemporalNumberCategoriesPerNestedClusterLevel	Surveillance Activity Location Temporal Number Categories Per Nested Cluster Level	Description of the number of categories each level of temporal nested clustering grouping Location example Level 1 contains seasons; Level 2, season 1 contains months, season 2 contains months,
SurveillanceActivityLocationPerTemporalNestedClusterCategoryKnown	Surveillance Activity Location Per Temporal Nested Cluster Category Known	Answer to question the number of Location

Variable	Label	Definition
	Nested Cluster Category	each category of each temporal cluster level grouping. Location known?' opposite opportunity and added to the Surveillance Activity develops
SurveillanceActivityLocationPerTemporalNestedClusterCategory	Surveillance Activity Location per Temporal Nested Cluster Category	Description of the number of Location each category of each temporal cluster level grouping. Location example Location season 1 include 3 Location during each the 3 months for a total Location season. 7 time frame between visit to a neighborhood within a visit to a is 2 days
SurveillanceActivityLocationTemporalNestedClustersOtherAttributes	Surveillance Activity Location Temporal Nested Clusters Other Attributes	Answer question temporal nested cluster grouping Location contain other properties included the data model?'

Variable	Label	Definition
SurveillanceActivityLocationTemporalNestedClustersListDefinitionOtherAttributes	Surveillance Activity Location Temporal Nested Clusters Definition Other Attributes	Describe the other attributes temporal nested clustering Location included the data model. Provide with the of the attribute their definition
SurveillanceActivityLocationTemporalNonNestedClustering	Surveillance Activity Location Temporal NonNested Clustering	Answer question Location the Surveillance Activity temporal clustered non-nested groups? example Location clustered date of the year and by decade
SurveillanceActivityLocationNumberTemporalNonNestedClusters	Surveillance Activity Location Number Temporal NonNested Clusters	The number of temporal non-nested clusters grouping Location
SurveillanceActivityLocationTemporalNonNestedClustersRepresent	Surveillance Activity Location Temporal NonNested Clusters Represent	Describe what each temporal nested clustering Location For example Cluster 1 dates of the year and cluster 2

Variable					Label	Definition
						decades
					Surveillance Activity Location Temporal Number Categories Per NonNested Cluster	Description: the number of categories for each non-nested cluster grouping Location example of the year contains options; decade contains years, etc
					Surveillance Activity Location per Temporal NonNested Cluster Category	Answer question: the number of categories within each temporal nested cluster grouping Location known?" opposite opportunit and added the Surveillance Activity develops
					Surveillance Activity Location per Temporal NonNested Cluster Category	Description: the Location per each category the non-temporal clusters grouping Location example Location each date the year 365 Location per year decade

Variable	Label	Definition
SurveillanceActivityLocationTemporalNonNestedClustersOtherAttributes	Surveillance Activity Location Temporal NonNested Clusters Other Attributes	Answer to question: 'Do you have temporal nested clustering information on Location? If yes, does it contain other properties included in the data model?'

SurveillanceActivityLocationTemporalNonNestedClustersListDefinitionOtherAttributes	Surveillance Activity Location Temporal NonNested Clusters Definition Other Attributes	Describe the other attributes temporal nested clustering Location included in the data model. Provide with the of the attribute their definition
--	--	--

SurveillanceActivityLocationTemporalClustersFileProvided	Surveillance Activity Location Temporal Clusters File Provided	Answer to question: 'Does the file contain the list of nested, non-nested, or types of temporal clusters grouping Location? If yes, their corresponding categories provided in file?'
--	--	---

Surveillance Activity - Event Clustering

Variable	Label	Definition
SurveillanceActivityEventClustering	Surveillance Activity Event Clustering	Answer to question: 'Do you have event clustering information on Location? If yes, does it contain other properties included in the data model?'

Variable	Label	Definition
SurveillanceActivityEventSpatialClustering	Activity Event Clustering	question:'Are Events of the Surveillance Activity clustered?'
	Surveillance Activity Event Spatial Clustering	Answer to the question:'Are Events of the Surveillance Activity spatially clustered (in nested or non-nested clusters)? For example, Events represent traps and traps are clustered by grid cells
	Surveillance Activity Event Spatial Nested Clustering	Answer to the question:'Are Events of the Surveillance Activity spatially clustered in nested levels? For example Events are traps and traps are clustered within grid cells
SurveillanceActivityEventSpatialNumberLevelsNestedClusters	Surveillance Activity Event Spatial Number Levels Nested Clusters	The number of spatial nested clusters grouping Events
SurveillanceActivityEventSpatialNestedClusterLevelsRepresent	Surveillance Activity Event Spatial Nested Clusters	Description of what each level of spatial nested clusters grouping Events is. For

Variable	Label	Definition
	Represent	example, Level 1 are areas Level are grid cells within areas
SurveillanceActivityEventSpatialNumberCategoriesPerNestedClusterLevel	Surveillance Activity Event Spatial Number Categories Per Nested Cluster Level	Description the number Categories, each level of nested cluster grouping Events. For example, Level 1 contains 4 areas; in Level 2, area 1 contains 20 grid cells, area 2 contains 1 grid cells, e
SurveillanceActivityEventPerSpatialNestedClusterCategoryKnown	Surveillance Activity Events Per Spatial Nested Cluster Category	Answer to the question: 'Is the number Events per each category within each spatial nested cluster grouping Events known?' The opposite is opportunistic and added as the Surveillance Activity develops
SurveillanceActivityEventPerSpatialNestedClusterCategory	Surveillance Activity Event Per Spatial Nested Cluster Category	Description the Events per each category of nested spatial cluster grouping Events. For example, 3 field activities for area 1 that include 3

Variable	Label	Definition
		Events per grid cell for total of 9 Events per grid cell. The time frame between each visit to a grid cell within a single visit to an area is 2 days
SurveillanceActivityEventSpatialNestedClustersOtherAttributes	Surveillance Activity Event Spatial Nested Clusters Other Attributes	Answer to the question: 'Do spatial nested clusters grouping Events contain other properties not included in the data model?'
SurveillanceActivityEventSpatialNestedClustersListDefinitionOtherAttributes	Surveillance Activity Event Spatial Nested Clusters Definition Other Attributes	Description of the other attributes of spatial nested clusters grouping Events not included in the data model. Provide a list with the name of the attributes and their definition
SurveillanceActivityEventSpatialNonNestedClustering	Surveillance Activity Event Spatial Non Nested Clustering	Answer to the question: 'Are Events of the Surveillance Activity spatially clustered in non-nested groups?' For example, Events

Variable	Label	Definition
		represent tree clustered by grid cells and also by phenology'
SurveillanceActivityEventSpatialNumberNonNestedClusters	Surveillance Activity Event Spatial Number Non Nested Clustering	The number of non-nested spatial clusters grouping Events
SurveillanceActivityEventSpatialNonNestedClusterRepresent	Surveillance Activity Event Spatial Non Nested Clusters Represent	Description what each spatial non- nested cluster grouping Events is. For example, cluster 1 are grid cells cluster 2 are phenological areas
SurveillanceActivityEventSpatialNumberCategoriesPerNonNestedCluster	Surveillance Activity Event Spatial Number Categories Per Non Nested Cluster	Description the number Categories per each non- nested cluster grouping Events. For example, cluster 1 contains 20 cells; cluster contains 2 phenological areas
SurveillanceActivityEventPerSpatialNonNestedClusterCategoryKnown	Surveillance Activity Event Per Spatial Number Categories Per Non Nested Cluster	Answer to the question: 'Is the number Events per each category of each spatial non-nested cluster grouping Events known?' The

Variable	Label	Definition
		opposite is opportunistic and added as the Surveillance Activity develops
SurveillanceActivityEventPerSpatialNonNestedClusterCategory	Surveillance Activity Event Per Spatial Non Nested Cluster Category	The number of Events per each category of each spatial non-nested cluster that grouping Events
SurveillanceActivityEventSpatialNonNestedClustersOtherAttributes	Surveillance Activity Event Spatial NonNested Clusters Other Attributes	Answer to the question: 'Describe the spatial non-nested cluster grouping Events containing other properties not included in the data model?'
SurveillanceActivityEventSpatialNonNestedClustersListDefinitionOtherAttributes	Surveillance Activity Event Spatial NonNested Clusters Definition Other Attributes	Description of the other attributes of the spatial non-nested cluster grouping Events not included in the data model. Provide a list with the name of the attributes and their definition
SurveillanceActivityEventSpatialClustersFileProvided	Surveillance Activity Event Spatial Clusters File Provided	Answer to the question: 'Is the file containing the list of nested, non-nested, or both types of

Variable	Label	Definition
		spatial clusters grouping Events and their corresponding categories provided in file?
SurveillanceActivityEventSpatialClustersSpatialProjection	Surveillance Activity Event Spatial Clusters Spatial Projection	The spatial projection of the spatial nested and non-nested clusters grouping Events provided in the file
SurveillanceActivityEventTemporalClustering	Surveillance Activity Event Temporal Clustering	Answer to the question: 'Are Events of the Surveillance Activity temporally clustered (in nested or non-nested clusters)? For example, Events are clustered by decade and month over the years
SurveillanceActivityEventTemporalNestedClustering	Surveillance Activity Event Temporal Nested Clustering	Answer to the question: 'Are Events of the Surveillance Activity temporally clustered in nested levels? For example, Events are clustered by month and then months are clustered by year

Variable							Label	Definition		
Surveillance	Activity	Event	Number	Temporal	Nested	Clusters	Levels	Surveillance Activity Event Number Temporal Nested Clusters Levels	The number of levels of temporal nested clustering grouping Events	
Surveillance	Activity	Event	Temporal	Nested	Cluster	Levels	Represent	Surveillance Activity Event Temporal Nested Cluster Levels Represent	Description of what each level of temporal nested clustering Events is. For example, Level 1 are seasons Level 2 are months within seasons	
Surveillance	Activity	Event	Temporal	Number	Categories	Per	Nested	Cluster	Level	Description of the number of Categories per each level of temporal nested clustering Events. For example, Level 1 contains 4 seasons; in Level 2, season 1 contains 3 months, season 2 contains 3 months, etc
Surveillance	Activity	Event	Per	Temporal	Nested	Cluster	Category	Known	Surveillance Activity Event Per Temporal Nested Cluster Category Known	Answer to the question: 'Is the number of Events per each category of each temporal cluster level grouping Events known?' The

Variable	Label	Definition
		opposite is opportunistic and added a the Surveillance Activity develops
SurveillanceActivityEventPerTemporalNestedClusterCategory	Surveillance Activity Event per Temporal Nested Cluster Category	Description: the number of Events per each category of each temporal cluster level grouping Events. For example, 3 Events for season 1 that include 3 Events during each of the months for total of 9 Events per season. The time frame between each visit to a neighborhood within a single visit to a city is 2 days
SurveillanceActivityEventTemporalNestedClustersOtherAttributes	Surveillance Activity Event Temporal Nested Clusters Other Attributes	Answer to the question: 'Do temporal nested clusters grouping Events contain other properties not included in the data model?'
SurveillanceActivityEventTemporalNestedClustersListDefinitionOtherAttributes	Surveillance Activity Event Temporal Nested Clusters	Description: the other attributes of temporal nested clusters grouping

Variable	Label	Definition
	Definition Other Attributes	Events not included in the data model. Provide a list with the name of the attributes and their definition
SurveillanceActivityEventTemporalNonNestedClustering	Surveillance Activity Event Temporal NonNested Clustering	Answer to the question: 'Are Events of the Surveillance Activity temporally clustered in non-nested groups?' For example, Events are clustered by date of the year and also by decade
SurveillanceActivityEventNumberTemporalNonNestedClusters	Surveillance Activity Event Number Temporal NonNested Clusters	The number of temporal non-nested clusters grouping Events
SurveillanceActivityEventTemporalNonNestedClustersRepresent	Surveillance Activity Event Temporal NonNested Clusters Represent	Description of what each temporal non-nested cluster grouping Events is. For example, Cluster 1 are dates of the year and cluster 2 are decades
SurveillanceActivityEventTemporalNumberCategoriesPerNonNestedCluster	Surveillance Activity Event Temporal Number	Description of the number of Categories per each non-nested cluster

Variable	Label	Definition
	Categories Per NonNested Cluster	grouping Events. For example, data of the year contains 36 options; decade contains 10 years, etc.
SurveillanceActivityEventPerTemporalNonNestedClusterCategoryKnown	Surveillance Activity Event per Temporal NonNested Cluster Category	Answer to the question: 'Is the number of Events per each category within each temporal non-nested cluster grouping Events known?' The opposite is opportunistic and added at the Surveillance Activity develops
SurveillanceActivityEventPerTemporalNonNestedClusterCategory	Surveillance Activity Event per Temporal NonNested Cluster Category	Description of the Events per each category of the non-nested temporal clusters grouping Events. For example, 1 Event for each date of the year and 36 Events per year of the decade
SurveillanceActivityEventTemporalNonNestedClustersOtherAttributes	Surveillance Activity Event Temporal NonNested Clusters Other	Answer to the question: 'Do temporal non-nested clusters grouping Events contain other

Outbreak

Variable	Label	Definition	Type	Mandatory
OutbreakID	Outbreak Identifier	System-provided Outbreak identifier	Integer	System-assigned
OutbreakDetectionDate	Outbreak Detection Date	The Date the first Source Records belonging to the Outbreak were found or	Date	Yes

Variable	Label	Definition	Type	Mandatory
		reported		
OutbreakFirstDayInvestigation	Outbreak First Day Investigation	The first date of the official outbreak investigation. This date can be different from the previous date because the first Spource Records could be found as part of another surveillance activity, such as a ranger patrol. Then, the investigation starts	Date	Yes
OutbreakName	Outbreak Name	The name provided to the outbreak	String	Yes
LastDayInvestigation	Outbreak First Day Investigation	The last date of the official outbreak investigation	Date	Yes
OutbreakDiagnosis	Outbreak Diagnosis	The diagnosis provided to the outbreak. Report the cause of the outbreak	String	No
OutbreakDiagnosisBasedOn	Outbreak Diagnosis Based On	The information supporting the diagnosis provided to the outbreak	String	No
OutbreakDiagnosisBy	Outbreak Diagnosis Based On	The health, animal, environmental, or another sector of the individual providing the diagnosis of the Outbreak	Single selection	No
OutbreakComments	Outbreak Comments	Provide any comments regarding the Outbreak	String	No

Field Visit

Variable	Label	Definition	Type	Mandatory
FieldVisitID	Field Visit Identifier	System-provided Field Visit identifier	Integer	System-assigned
FieldVisitCode	Field Visit Code	User-provided Field Visit code	String	Yes
FieldVisitCrossReferenceID	Field Visit Cross Identifier	The identifier of the Field Visit under another nomenclature system. For	String	No

Variable	Label	Definition	Type	Mandatory
		example, in a different database or document where other identification for the same Field Visit is used		
FieldVisitCrossReferenceIDOrigin	Field Visit Cross Identifier Origin	The location/database/document where other identification for the same Field Visit is used	String	No
FieldVisitLeader	Field Visit Leader	The name of the leader of the Field Visit	Single selection	Yes
FieldVisitWhere	Field Visit Places Visited	Briefly describe the places to be visited during the Field Visit	String	Yes
FieldVisitStartDate	Field Visit Start Date	The date the Field Visit started	Date	Yes
FieldVisitEndDate	Field Visit End Date	The date the Field Visit ended or the anticipated ending date	Date	Yes

Location

Variable	Label	Definition	Type	Mandatory
LocationID	Location Identifier	System-provided Location identifier	Integer	System-assigned
LocationName	Location Code	User-provided Location code	String	Yes
Location Polygon ID	Location Polygon Identifier	If a spatial file with the different Locations has been entered in the database, then provide the ID of the polygon representing the Location in such file. This attribute is available only when the spatial file has been entered in the database as reported in the Surveillance Activity metadata	String	No

Variable	Label	Definition	Type	Mandatory
LocationCrossReferenceID	Location Cross Identifier	The identifier of the Location under another nomenclature system. For example, in a different database or document where other identification for the same Location is used	String	No
LocationCrossReferenceIDOrigin	Location Cross Identifier Origin	The database/document/other where other identification for the same Location is used	String	No
LocationPurpose	Location Purpose	Description of the objectives to accomplish in the Location	String	Yes
LocationTargetedSources	Location Targeted Sources	Indicate the type of Sources (Group, Animal, Environmental, or Arthropod) to be collected at the Location	Multiple selection	Yes
LocationType	Location Type	The type of Location containing Events (e.g., 'market', 'zone in Protected area', 'grid cell', 'parcel', etc')	Single selection	Yes
LocationDescription	Location Description	A general description of the Location	String	No
LocationArea	Location Area	The Area value of the Location	Float	No
LocationAreaUnit	Location Area	The measurement unit for the Area value of the Location	Single selection	No
LocationAreaPrecision	Location Area Precision	The precision of the reported Area value of the Location	Single selection	No
LocationPolygonCoordinates	Location Polygon Coordinates	The data of the Location polygon coordinates in json format (e.g., { "type": "Feature", "geometry": { "type": "Polygon", "coordinates": [[[-99.1354, 19.4326], [-99.1325,	String	No

Variable	Label	Definition	Type	Mandatory
		19.4350], [-99.1300, 19.4310], [-99.1350, 19.4290], [-99.1354, 19.4326]]] }, "properties": { } } when WGS is used or { "type": "Feature", "geometry": { "type": "Polygon", "coordinates": [[[489500.23, 2150450.78], [489750.67, 2150700.12], [490000.89, 2150300.45], [489800.56, 2150100.33], [489500.23, 2150450.78]]] }, "properties": { "crs": "EPSG:32614" } } when the coordinates are projected		
LocationFindings	Location Findings	Describe any health hazard findings across the Location scale	String	No
LocationStartDate	Location Start Date	The date the activities in the Location started	Date	Yes
LocationEndDate	Location End Date	The date the activities in the Location ended or the anticipated ending date	Date	Yes
LocationComments	Location Comments	Provide any other relevant information regarding the Location	String	No

Location Clustering

Variable	Label	Definition	Type	Mandatory
LocationClusterCode	Location Cluster Code	User-provided Location Cluster Code	String	Yes
LocationClusterCrossReferenceID	Location Cluster Cross Reference ID	The identifier of a cluster grouping Locations in another system (e.g., database/document/other)	String	No
LocationClusterCrossReferenceIDOrigin	Location Cluster Cross	The database/document/other	String	No

Variable	Label	Definition	Type	Mandatory
	Reference ID Origin	r where other identification for the same cluster grouping Locations is used		
LocationClusterType	Location Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
LocationClusterUnit	Location Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
LocationClusterComments	Location Cluster Comments	Any other comments regarding the Location Source clusters	String	No

Event

Variable	Label	Definition	Type	Mandatory
EventID	Event Identifier	System-provided Event identifier	Integer	System-assigned
EventCode	Event Code	User-provided Event code	String	Yes
EventCrossReferenceID	Event Cross Identifier	The identifier of an Event in another system (e.g., database/document/other)	String	No
EventCrossReferenceIDOrigin	Event Cross Identifier Origin	The database/document/other where other identification for the same Event is used	String	No
EventFindings	Event Findings	Specific set of findings at the Event scale that are dynamic over time and could represent a health threat (e.g., fire, smoke, etc)	Multiple selection	Yes
EventOtherFeatures	Other Event Findings	Other findings at the Event that are dynamic over time not listed in the previous attribute	String	No
EventBySector	Sector of the Reporter	The sector of the person that reported the Event	Single selection	No

Variable	Label	Definition	Type	Mandatory
EventDate	Event Date	The date and time of the Event	String	Yes
EventCoordinatesSource	The Source of the Coordinates Data	The source of the coordinates (longitude and latitude) of the Event	Single selection	Yes
EventCoordinateSystem	Event Coordindate System	The coordinate system of the Event longitude and latitude reported	Single selection	Yes
EventLongitude	Event Longitude	Longitude coordinate in decimal degrees	Float	Yes
EventLatitude	Event Latitude	Latitude coordinate in decimal degrees	Float	Yes
EventUTMZone	Event UTM Zone	UTM Zone where the Event occurs. It applies if the longitude an latitude of the Event are provided in UTM coordinate reference system. See https://www.dmap.co.uk/utmworld.htm	Single selection	Yes
EventUTMEasting	Event UTM Easting	UTM Easting value where the Event occurs	Float	Yes
EventUTMNorthing	Event UTM Northing	UTM Northing value where the Event occurs	Float	Yes
EventDMSLongitudeDegrees	Event Longitude Degrees	The degree value of the longitude coordinate (absolute value)	Integer	Yes
EventDMSLongitudeMinutes	Event Longitude Minutes	The minutes value of the longitude coordinate	Integer	Yes
EventDMSLongitudeSeconds	Event Longitude Seconds	The seconds value of the longitude coordinate	Float	Yes
EventDMSLongitudeHemisphere	Event Longitude Hemisphere	The eastern or western hemisphere where the Event occurs	Single selection	Yes
EventDMSLatitudeDegrees	Event Latitude	The degree value of the latitude coordinate	Integer	Yes

Variable	Label	Definition	Type	Mandatory
	Degrees	(absolute value)		
EventDMSLatitudeMinutes	Event Latitude Minutes	The minutes value of the latitude coordinate	Integer	Yes
EventDMSLatitudeSeconds	Event Latitude Seconds	The seconds value of the latitude coordinate	Float	Yes
EventDMSLatitudeHemisphere	Event Latitude Hemisphere	The northern or southern hemisphere where the Event occurs	Single selection	Yes
AreaAroundEvent	Area Around Event	Answer to the question: 'Does the Event include Source Records distributed around its longitude and latitude recorded?'	Single selection	No
EventAreaValue	Event Area Value	Value of the area surface centered in the longitude and latitude of the Event (surface of the area around the Event containing Source Records)	Single selection	Yes
EventAreaValueUnit	Event Area Value Unit	The unit of the area surface centered in the longitude and latitude of the Event	Single selection	Yes
EventAreaAroundEvent	Area Around Event Precision	The precision of the value reported for the surface of the area around the Event	Single selection	Yes
EventCountry	Event Country	Country where the Event occurs	Single selection	Yes
EventCountry	Event Country	Country where the Event occurs	Single selection	Yes
EventCountry	Event Country	Country where the Event occurs	Single selection	Yes
EventStateProvince	Event State Or Province	State or Province where the Event occurs	Single selection	No
EventCounty	Event County	County where the Event occurs	String	No
EventComments	Event	Any other comments	String	No

Variable	Label	Definition	Type	Mandatory
Comments		regarding the Event		
Event Clustering				
Variable	Label	Definition	Type	Mandatory
EventClusterCode	Event Cluster Code	User-provided Event Cluster Code	String	Yes
EventClusterCrossReferenceID	Event Cluster Cross Reference ID	The identifier of a cluster grouping Events in another system (e.g., database/document/other)	String	No
EventClusterCrossReferenceIDOrigin	Event Cluster Cross Reference ID Origin	The database/document/other where other identification for the same cluster grouping Events is used	String	No
EventClusterType	Event Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
EventClusterUnit	Event Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
EventClusterComments	Event Cluster Comments	Any other comments regarding the Event Source clusters	String	No
Collection				
Variable	Label	Definition	Type	Mandatory
CollectionPointID	Collection Point Identifier	System-provided Collection Point identifier	Integer	System-assigned
CollectionPointPassiveActive	Collection Point Active	Answer to the question: 'Is the Collection Point active?' (markets or other facilities where wildlife is already captured does not involve	Boolean	Yes

Variable	Label	Definition	Type	Mandatory
		effort)		
CollectionPointCode	Collection Point Code	User-provided Collection Point code)	Boolean	No
CollectionPointCrossReferenceID	Collection Point Cross Identifier	The identifier of an Collection Point in another system (e.g., database/document/other)	String	No
CollectionPointCrossReferenceIDOrigin	Collection Point Cross Identifier Origin	The database/document/other where other identification for the same Event is used	String	No
CollectionPointSourceMethod	Collection Point Source Method	The tools employed in the Collection Point (e.g., observation, capture, camera-trap)	Single selection	Yes
CollectionPointSourceTarget	Collection Point Source Target	The type of Source to obtain through the Collection Point	Single selection	Yes
CollectionPointSpatialEffortUnit	Collection Point Spatial Effort Unit	The unit to measure the spatial effort associated with the Collection Point (e.g., CO2 traps, mist nets, km walked, squared kilometers covered, etc.)	Single selection	Yes
CollectionPointSpatialEffortUnitQuantity	Collection Point Spatial Effort Unit Quantity	The number of units of spatial effort associated with the Collection Point in the unit	Float	Yes

Variable	Label	Definition	Type	Mandatory
		reported in the previous attribute		
CollectionPointSpatialEffortExactorEstimated	Collection Point Spatial Effort Exact	Answer to the question: 'Is the spatial effort exact?'	Boolean	Yes
CollectionPointTemporalEffortUnit	Collection Point Temporal Effort Unit	The unit to measure the temporal effort associated with the Collection Point (e.g., night-hours, days, year, etc.)	Single selection	Yes
CollectionPointTemporalEffortUnitQuantity	Collection Point Temporal Effort Unit Quantity	The number of units of temporal effort associated with the Collection Point in the unit reported in the previous attribute	Float	Yes
CollectionPointTemporalEffortExactorEstimated	Collection Point Temporal Effort Exact	Answer to the question: 'Is the temporal effort exact?'	Boolean	Yes
CollectionLureUsed	Collection Point Attractants	The lure used to collect Sources, if any	Single selection	Yes
CollectionPointProblems	Collection Point Problems	Any problems occurred during the Collection Point such as torn mist net, broken trap, etc.	String	No
CollectionComments	Collection Point Comments	Any other comments regarding the Collection	String	No

Source

Variable	Label	Definition	Type	Mandatory
SourceID	Source Identifier	System-provided source identifier	Integer	System-assigned
SourceCode	Source Code	User-given Source Code	String	Yes
SourceCrossReferenceID	Source Cross Identifier	The identifier of the Source under another nomenclature system. For example, in a different database or document where other identification for the same Source is used	String	No
SourceCrossReferenceIDOrigin	Source Cross Identifier Origin	The location/database/document where other identification for the same Source is used	String	No
SourceType	Source Type	The type of Source (e.g., 'Group', 'Animal', 'Environmental', 'Arthropod')	Single selection	Yes
SourceComments	Source Comments	Any comments regarding the Source	String	No

Group Source

Variable	Label	Definition	Type	Mandatory
SourceSpecies	Source Species	The Group Source species	Single selection	Yes

Animal Source

Variable	Label	Definition	Type	Mandatory
SourceSpecies	Animal Source Species	The Animal Source species	Single selection	Yes
SourceSex	Source Species Sex	The Source Sex	Single selection	Yes
SourcePreviousMarkingCode	Animal Source Previous	A known marking code of the Animal Source, if any, before the current	String	No

Variable	Label	Definition	Type	Mandatory
	Marking Code	marking code, if any		
AnimalSourceFromGroupSource	Animal Source From Group Source	Answer to the question: 'Is the Animal Source coming from a Group Source to be now considered as a specific individual?'	Boolean	Yes
AnimalSourceFromGroupSourceGroupID	Animal Source From Group Source Group ID	The ID of the Group Source that the Animal Source belonged to	String	Yes

Source Record

Group Source Record

Variable	Label	Definition	Type	Mandatory
GroupAnimalSourceRecordDistancetoSource	Distance to the Group Source Record	In case of transect or similar, this is the distance in any unit from the Event (point in transect) to the Group Source	Numeric	No
GroupAnimalSourceRecordDistancetoSourceUnit	Unit of the Distance	The unit for the distance from the Event (point in a transect) to the Group Source (e.g., meters, kilometers)	Single selection	Yes
GroupAnimalArthropodSourceRecordSex	Group Source Record Sex of the Animals	A sex category of the animals in the Group Source Record that are also stratified by	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
GroupAnimalArthropodSourceRecordAge	Group Source Record Age of the Animals	initial health status and age class	Single selection	Yes
		An age category of the animals in the Group Source Record that are also stratified by initial health status and sex class		
GroupAnimalSourceRecordCaptivityCategory	Group Source Record Captivity Category	The captivity category of the animals in the Group Source Record. Multiple options can be selected	Multiple selection	Yes
GroupAnimalSourceRecordTimeSinceHunted	Group Source Time Since Hunted	The period that the animals of the Group Source have been hunted. The unit must be provided also (e.g., '20 minutes', 'Two days', etc.)	String	No
GroupAnimalSourceRecordNameFacility	Group Source Record Name Facility	The name of the facility where the Group Source is	String	Yes
GroupAnimalSourceRecordAdmissiontoFacility	Group Source Record Date Entered to the Facility	The date the Group Source Record entered to the facility. Applies when the Location type is a farm	Date	No

Variable	Label	Definition	Type	Mandatory
		or similar		
GroupAnimalSourceRecordTimeOutNaturalHabitat	Group Source Record Time Out Natural Habitat	The period of time the Group Source has not been on its natural area	String	Yes
GroupAnimalSourceRecordInPenOrCage	Group Source In Pen or Cage	Answer to the question: 'Is the Group Source in a pen or a cage?'	Boolean	Yes
GroupAnimalSourceRecordPenCageIdentifier	Group Source Record Pen Cage Identifier	The identifier of the pen or cage where the Group Source is	String	Yes
GroupAnimalSourceRecordAdmissiontoPenCage	Group Source Record Date Entered to the Pen or Cage	The date the Group Source Record entered to the Pen or Cage. Applies when the Location type is a market or similar	Date	No
SourceRecordInitialHealthStatus	Group Source Record Initial Health Status	An initial health status category of the animals in the Group Source Record that are also stratified by sex and age class	Single selection	Yes
GroupAnimalSourceRecordHealthStatusAssessedBy	Group Source Record Health Status Assessed By	The health, animal, environmental , or another sector of the individual assigning the initial health	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
		status		
GroupAnimalSourceRecordAnomaly	Group Source Record Anomalies	The anomalies detected in the animals of the Group Source Record reported as sick, injured, or dead per sex and age category	Multiple selection	Yes
GroupAnimalSourceRecordOtherAnomalies	Group Source Record Other Anomalies	Other anomalies not listed in the previous field in the animals of the Group Source Record reported as sick, injured, or dead per sex and age category	Multiple selection	No
GroupAnimalSourceRecordAnomaliesBy	Group Source Record Anomalies By	The health, animal, environmental , or another sector of the individual reporting the anomalies in sick, injured, or dead animals of the Group Source Record. Not available if all animals are healthy	Single selection	Yes
GroupAnimalSourceRecordPotentialCauseInjuryDisease	Group Source Record Potential Cause Injury or Disease	The potential causes of injury or disease in the animals of the Group Source Record that are reported as sick or injured per sex and	Multiple selection	Yes

Variable	Label	Definition	Type	Mandatory
		age category		
GroupAnimalSourceRecordPotentialCauseInjuryDiseaseBy	Group Source Record Potential Cause Injury Disease By	The health, animal, environmental , or another sector of the individual reporting the potential cause of injury or disease in sick or injured animals of the Group Source Record. Not available if all animals are healthy or dead	Single selection	Yes
GroupAnimalSourceRecordPotentialCauseDeath	Group Source Record Potential Cause Death	The potential causes of death in the animals of the Group Source Record that are reported as dead per sex and age category	Multiple selection	Yes
GroupAnimalSourceRecordPotentialCauseDeathBy	Group Source Record Potential Cause Injury Disease By	The health, animal, environmental , or another sector of the individual reporting the potential cause of death in dead animals of the Group Source Record. Not available if no animals are dead	Single selection	Yes
GroupArthropodSourceRecordNumberAnimals	Group Source Record	The number animals of the corresponding	Integer	Yes

Variable	Label	Definition	Type	Mandatory
	Number of Animals	sex, age, and initial health status category		
GroupArthropodSourceRecordExactNumber	Group Source Record Number is Exact	Answer to the question: 'Is the number of animals reported per sex, age, and initial health status category exact?'	Boolean	Yes

Group Source Record - Clustering

Variable	Label	Definition	Type	Mandatory
GroupSourceRecordClusterCode	Group Source Record Cluster Code	User-provided Group Source Record Cluster Code	String	Yes
GroupSourceRecordClusterCrossReferenceID	Group Source Record Cluster Cross Reference ID	The identifier of a cluster grouping Group Source Records in another system (e.g., database/document/other)	String	No
GroupSourceRecordClusterCrossReferenceIDOrigin	Group Source Record Cluster Cross Reference ID Origin	The database/document/other where other identification for the same cluster grouping Group Source Records is used	String	No

Variable	Label	Definition	Type	Mandatory
GroupSourceRecordClusterType	Group Source Record Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
GroupSourceRecordClusterUnit	Group Source Record Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
GroupSourceRecordClusterComments	Group Source Record Cluster Comments	Any other comments regarding the Group Source clusters	String	No

Animal Source Record

Variable	Label	Definition	Type	Mandatory
GroupAnimalSourceRecordDistancetoSource	Distance to the Animal Source Record	In case of transect or similar, this is the distance in any unit from the Event (point in transect) to the Animal Source	Numeric	No
GroupAnimalSourceRecordDistancetoSourceUnit	Unit of the Distance	The unit for the distance from the Event (point in a transect) to the Animal Source (e.g., meters, kilometers)	Single selection	Yes
GroupAnimalArthropodSourceRecordAge	Animal Source Record Age of the Animal	An age category of the Animal Source Record	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
GroupAnimalSourceRecordCaptivityCategory	Animal Source Record Captivity Category	The captivity category of the Animal Source Record	Multiple selection	Yes
GroupAnimalSourceRecordNameFacility	Animal Source Record Name Facility	The name of the facility where the Animal Source is	String	Yes
GroupAnimalSourceRecordAdmissiontoFacility	Animal Source Record Date Entered to the Facility	The date the Animal Source Record entered to the facility. Applies when the Location type is a farm or similar	Date	No
GroupAnimalSourceRecordTimeOutNaturalHabitat	Animal Source Record Time Out Natural Habitat	The period of time the Animal Source has not been on its natural area	String	Yes
GroupAnimalSourceRecordInPenOrCage	Animal Source In Pen or Cage	Answer to the question: 'Is the Animal Source in a pen or a cage?'	Boolean	Yes
GroupAnimalSourceRecordPenCageIdentifier	Animal Source Record Pen Cage Identifier	The identifier of the pen or cage where the Animal Source is	String	Yes
GroupAnimalSourceRecordAdmissiontoPenCage	Animal Source Record Date Entered to the Pen or Cage	The date the Animal Source Record entered to the Pen or Cage. Applies when the Location	Date	No

Variable	Label	Definition	Type	Mandatory
GroupAnimalSourceRecordInitialHealthStatus		type is a market or similar		
	Animal Source Record Initial Health Status	An initial health status category of the Animal Source Record	Single selection	Yes
GroupAnimalSourceRecordHealthStatusAssessedBy	Animal Source Record Health Status Assessed By	The health, animal, environmental, or another sector of the individual assigning the initial health status	Single selection	Yes
GroupAnimalSourceRecordAnomaly	Animal Source Record Anomalies	The anomalies detected in the Animal Source Record reported as sick, injured, or dead	Multiple selection	Yes
GroupAnimalSourceRecordOtherAnomalies	Animal Source Record Other Anomalies	Other anomalies not listed in the previous field in the Animal Source Record reported as sick, injured, or dead	String	No
GroupAnimalSourceRecordAnomaliesBy	Animal Source Record Anomalies By	The health, animal, environmental, or another sector of the individual reporting the anomalies in the sick, injured, or	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
GroupAnimalSourceRecordPotentialCauseInjuryDisease	Animal Source Record Potential Cause Injury or Disease	dead Animal Source Record. Not available if all Animal Source Record is healthy The potential causes of injury or disease in the Animal Source Record that is reported as sick or injured	Multiple selection	Yes
GroupAnimalSourceRecordPotentialCauseInjuryDiseaseBy	Animal Source Record Potential Cause Injury Disease By	The health, animal, environmental, or another sector of the individual reporting the potential cause of injury or disease in the Animal Source Record. Not available if the Animal Source Record is healthy or dead	Single selection	Yes
AnimalSourceRecordVaccination	Animal Source Record Vaccination	Answer to the question: 'Animal Source vaccinated at time t?'	Boolean	Yes
AnimalSourceRecordFinalHealthStatus	Animal Source Record Final Health Status	The health status of the Animal Source Record at the	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
		end of the observation		
AnimalSourceDateOfDeathKnown	Animal Source Record Date of Death Known	Answer to the question: 'Is the Animal Source date of death known?'	Boolean	Yes
AnimalSourceDateOfDeath	Animal Source Record Date of Death	The date the Animal Source died	Date	Yes
GroupAnimalSourceRecordPotentialCauseDeath	Animal Source Record Potential Cause Death	The potential causes of death of the Animal Source Record	Multiple selection	Yes
GroupAnimalSourceRecordPotentialCauseDeathBy	Animal Source Record Potential Cause Injury Disease By	The health, animal, environmental, or another sector of the individual reporting the potential cause of death of the Animal Source Record. Not available if the Animal Source Record is not dead	Single selection	Yes
AnimalSourceRecordEuthanasiaMethod	Animal Source Record Euthanasia Method	The euthanasia method used in the Animal Source	Single selection	Yes
AnimalSourceRecordCarcassFieldCondition	Animal Source Record Carcass Field	The condition of the Carcass when it was collected at	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
	Condition	time t		
AnimalSourceRecordCarcassAction	Animal Source Record Carcass Action	Description of what was done with the Carcass found in the field or captive facility	Single selection	Yes
AnimalSourceRecordAnyMarkingCode	Animal Source Record Any Marking Code	Answer to the question: 'Was there any marking in the Animal Source at time t that allowed its individual identification ?'	String	No
AnimalSourceRecordMarkingCode	Animal Source Record Marking Code	The marking of the Animal Source at time t	String	Yes
AnimalSourceRecordMarkingCodeChange	Animal Source Record Marking Code Change	Answer to the question: 'Was the marking code changed at time t?'	Boolean	No
AnimalSourceRecordMarkingCodeChangingReason	Animal Source Record Marking Code Change Reason	Provide an explanation for changing the marking code	String	No

Animal Source Record - Vaccination

Variable	Label	Definition	Type
AnimalSourceRecordVaccinationID	Animal Source Record	System-provided Vaccination	Integer

Variable	Label	Definition	Type
AnimalSourceRecordVaccinationCode	Vaccination ID	identifier	
	Animal Source Record Vaccination Code	User-provided Vaccination code	String
AnimalSourceRecordVaccinationCrossReferenceID	Animal Source Record Vaccination Cross Identifier	The identifier of a Vaccination in another system (e.g., database/document/other)	String
AnimalSourceRecordVaccinationCrossReferenceIDOrigin	Animal Source Record Vaccination Cross Identifier Origin	The database/document/other where other identification for the same Vaccination is used	String
AnimalSourceRecordVaccinationVaccineName	Animal Source Record Vaccine Name	The commercial name of the vaccine administered	String
AnimalSourceRecordVaccinationVaccineType	Animal Source Record Vaccine Type	The type of vaccine administered	Single select
AnimalSourceRecordVaccinationAgainst	Animal Source Record Vaccinated Against	The hazard(s) targeted for protection by the vaccine administered	Multiple select
AnimalSourceRecordVaccinationVaccineExpirationDate	Animal Source Record Vaccine Expiration Date	The date the administered vaccine expires	Date
AnimalSourceRecordVaccinationVaccineFieldStorage	Animal Source	The method to store the vaccine	Single select

Variable	Label	Definition	Type
AnimalSourceRecordVaccination	Record Vaccine Field Storage	or keep the cold chain while on the field	selection
	Animal Source Record Vaccine Days Stored in Field	The number of days the vaccine was stored while on the field before administration	Integer
	Animal Source Record Vaccine Cold Chain Maintained	Answer to the question: 'Was the vaccine maintained in the cold chain before the administration?'	Single selection
AnimalSourceRecordVaccinationDate	Animal Source Record Vaccination Date	The date the vaccine was applied	Date
AnimalSourceRecordVaccinationBy	Animal Source Record Vaccination By	The person that administered the vaccine	Single selection
AnimalSourceRecordVaccinationVaccineDose	Animal Source Record Vaccine Dose	The dose of vaccine administered (amount and unit)	String
AnimalSourceRecordVaccinationVaccineRoute	Animal Source Record Vaccine Route	The route of vaccine administration	Single selection
AnimalSourceRecordVaccinationLocation	Animal Source Record Vaccination Location	The anatomical location where the vaccine was administered	String
AnimalSourceRecordVaccinationMinutesOfObservationAfterVaccination	Animal Source	Minutes the Animal Source	Integer

Variable	Label	Definition	Type
AnimalSourceRecordVaccination	Record Vaccination Minutes of Observation	was monitored after being vaccinated at time *t*	
	VaccinationReaction	Answer to the question: 'Did the vaccination cause any adverse reaction?'	Boolean
	VaccinationReactionDescription	Description of any reaction observed in the Animal Source after vaccinated at time *t*	String
AnimalSourceRecordVaccinationComments	Animal Source Record Vaccination Comments	Comments regarding the vaccination	String

Animal Source Record - Carcass

Variable	Label	Definition	Type	Mandatory
AnimalSourceRecordCarcassID	Carcass Identifier	System-provided Carcass identifier	Integer	System-assigned
AnimalSourceRecordCarcassCode	Carcass Code	User-given Carcass Code	String	Yes
AnimalSourceRecordCarcassCrossReferenceID	Carcass Cross Identifier	The identifier of the Carcass under another nomenclature system. For example, in a different database or document where other identification for the same Carcass is used	String	No
AnimalSourceRecordCarcassCrossReferenceIDOrigin	Carcass	The	String	No

Variable	Label	Definition	Type	Mandatory
	Cross Identifier Origin	location/database /document where other identification for the same Carcass is used		
AnimalSourceRecordCarcassNecropsy	Carcass To Necropsy	Answer to the question: 'Carcass used for a field, primary, or secondary necropsy?'	Boolean	Yes
AnimalSourceRecordCarcassFieldStorage	Carcass Field Storage	The method to store the carcass in the field or captive facility while in transit to a proper facility	Single selection	Yes
AnimalSourceRecordCarcassColdChainMaintainedInSitu	Carcass Cold Chain Maintained In Situ	Answer to the question: 'Was the cold chain for the Carcass maintained after its collection in the field or captive facility until arrival to the storage facility (e.g., pathology laboratory)?'	Boolean	Yes
AnimalSourceRecordCarcassFieldStorageProblems	Carcass Field Storage Problems	Description of any problems faced during the storage of the Carcass while on the field or captive facility	String	No
AnimalSourceRecordCarcassAvailable	Carcass Available	Answer to the question: 'Is the Carcass available for use, necropsy, collection of Specimens, etc.?'	Boolean	Yes
AnimalSourceRecordCarcassReasonNotAvailable	Carcass Reason Not	Explanation about why the	Boolean	Yes

Variable	Label	Definition	Type	Mandatory
AnimalSourceRecordCarcassOwner	Available	Carcass is not available		
	Carcass Owner	The owner of the Carcass	Single selection	Yes
	Carcass Comments	Any comments regarding the Carcass	String	Yes

Animal Source Record - Necropsy

Variable	Label	Definition	Type	Mandatory
NecropsyID	Necropsy Identifier	System-provided necropsy identifier	Integer	System-assigned
NecropsyCode	Necropsy Code	User-given Necropsy Code	String	Yes
NecropsyCrossReferenceID	Necropsy Cross Identifier	The identifier of a Necropsy in another system (e.g., database/document/other)	String	No
NecropsyCrossReferenceIDOrigin	Necropsy Cross Identifier Origin	The database/document/other where other identification for the same Necropsy is used	String	No
NecropsyDate	Necropsy Date	The date the Necropsy was conducted	String	Yes
NecropsyFieldPrimarySecondary	Field, Primary, or Secondary Necropsy	The necropsy type with respect to where is conducted'	Single selection	Yes
NecropsyType	Necropsy Type	The necropsy type with respect to its completeness (e.g., 'Partial necropsy', 'Full necropsy')	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
NecropsyFacility	Necropsy Facility	The facility where the necropsy was conducted	Single selection	Yes
NecropsyFacilityID	Necropsy Facility ID	The identifier of the facility where the necropsy was conducted	Single selection	Yes
NecropsyBy	Necropsy By	The person who conducted the necropsy	Single selection	Yes
NecropsyCarcassCondition	Carcass Condition at Necropsy	The condition of the carcass by the time of the necropsy	Single selection	Yes
NecropsyExternalSigns	External Signs	The external signs observed in the Carcass	String	No
NecropsyBodyCondition	Body Condition	The body condition observed in the Carcass	Single selection	No
NecropsyEyes	Eyes	Findings in the eyes of the Carcass	String	No
NecropsyEars	Ears	Findings in the ears of the Carcass	String	No
NecropsyNostrils	Nostrils	Findings in the nostrils of the Carcass	String	No
NecropsyMouth	Mouth	Findings in the mouth of the Carcass	String	No
NecropsySkin/Hair/Coat/Nails	Skin, Hair, Coat, Nails	Findings in the skin, hair, coat, or nails of the Carcass	String	No
NecropsyWoundsScars	Wounds or Scars	Wounds and scars in the Carcass	String	No
NecropsyExternalParasites	External Parasites	External parasites on the Carcass	String	No
NecropsyInternalParasites	Internal Parasites	Internal parasites in the Carcass	String	No

Variable	Label	Definition	Type	Mandatory
NecropsyAnus/Perineum/Cloaca	Anus, Perineum, or Cloaca	Findings in the anus, perineum, or cloaca of the Carcass	String	No
NecropsySubcutaneousFat	Subcutaneous Fat	The amount of subcutaneous fat of the Carcass	String	No
NecropsyMuscleMass	Muscles Mass	The characteristics of the muscle mass of the Carcass	String	No
NecropsyMusculoskeletalSyst	Musculoskeletal System	Findings in the musculoskeletal system of the Carcass	String	No
NecropsyBodyCavities	Body Cavities	Findings in the body cavities of the Carcass (e.g., 'abdominal', 'thoracic')	String	No
NecropsyCardiovascularSyst	Cardiovascular System	Findings in the cardiovascular system of the Carcass	String	No
NecropsyRespiratorySyst	Respiratory System	Findings in the respiratory system of the Carcass	String	No
NecropsyGastrointestinalSyst	Gastrointestinal System	Findings in the gastrointestinal system of the Carcass	String	No
NecropsyUrinarySyst	Urinary System	Findings in the urinary system of the Carcass	String	No
NecropsyReproductiveSyst	Reproductive System	Findings in the reproductive system of the Carcass	String	No
NecropsyLymphaticSyst	Lymphatic System	Findings in the lymphatic system of the Carcass	String	No

Variable	Label	Definition	Type	Mandatory
NecropsyEndocrineSyst	Endocrine System	Findings in the endocrine system of the Carcass	String	No
NecropsyNervousSyst	Nervous System	Findings in the nervous system of the Carcass	String	No
NecropsyConclusion	Necropsy Conclusion	The conclusion of the necropsy	String	No
NecropsyProblems	Necropsy Problems	Any problems regarding the necropsy	String	No
NecropsyComments	Necropsy Comments	Any comments regarding the necropsy	String	No
NecropsyNeedsPathologistReview	Needs pathologist review	Answer to the question: 'Does the necropsy need a pathologist review?'	Boolean	Yes
NecropsyTopography	Necropsy Findings Topography	The location of the lesions or findings	Multiple selection	No
NecropsyTopography	Necropsy Findings Morphology	The pathological aspect of the lesions or findings	Multiple selection	No
NecropsyEthiology	Necropsy Findings Ethiology	The suspected or established cause of the lesions or findings	Multiple selection	No

Animal Source Record - Clustering

Variable	Label	Definition	Type	Mandatory
AnimalSourceRecordClusterCode	Animal Source Record Cluster Code	User-provided Animal Source Record Cluster Code	String	Yes
AnimalSourceRecordClusterCrossReferenceID	Animal Source Record Cluster	The identifier of a cluster grouping Animal Source	String	No

Variable	Label	Definition	Type	Mandatory
animalSourceRecordClusterCrossReferenceIDOrigin	Cross Reference ID	Records in another system (e.g., database/document/other)	String	No
	animal Source Record Cluster Cross Reference ID Origin	The database/document/other where other identification for the same cluster grouping Animal Source Records is used		
AnimalSourceRecordClusterType	Animal Source Record Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
AnimalSourceRecordClusterUnit	Animal Source Record Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
AnimalSourceRecordClusterComments	Animal Source Record Cluster Comments	Any other comments regarding the Animal Source clusters	String	No

Environmental Source Record

Variable	Label	Definition	Type	Mandatory
EnvironmentalSourceRecordType	Environmental Source Record Type	The type of environmental tissue, biotic or abiotic, collected from the environmental source (site)	Single selection	Yes
EnvironmentalSourceRecordQuantity	Environmental Source Record Quantity	The amount of environmental tissue, biotic or abiotic, collected from the	Float	Yes

Variable	Label	Definition	Type	Mandatory
		environmental source (site)		
EnvironmentalSourceRecordQuantityUnit	Environmental Source Record Quantity Unit	The unit of measure for the amount of environmental tissue, biotic or abiotic, collected from the environmental source (site)	Single selection	Yes
SourceSpecies	Environmental Source Species Origin	The species that sourced a biotic Environmental Source Record. Usually applies for feces. A high level taxonomy can be provided if that is the best choice. For example, 'mammalia'	Single selection	Yes

Environmental Source Record - Clustering

Variable	Label	Definition	Type	Mandatory
EnvironmentalSourceRecordClusterCode	Environmental Source Record Cluster Code	User-provided Environmental Source Record Cluster Code	String	Yes
EnvironmentalSourceRecordClusterCrossReferenceID	Environmental Source Record Cluster Cross Reference ID	The identifier of a cluster grouping Environmental Source Records in another system (e.g., database/document/other)	String	No
EnvironmentalSourceRecordClusterCrossReferenceIDOrigin	Environmental Source Record Cluster Cross Reference ID Origin	The database/document/other where other identification for the same cluster grouping Environmental	String	No

Variable	Label	Definition	Type	Mandatory
		Source Records is used		
EnvironmentalSourceRecordClusterType	Environmental Source Record Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
EnvironmentalSourceRecordClusterUnit	Environmental Source Record Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
EnvironmentalSourceRecordClusterComments	Environmental Source Record Cluster Comments	Any other comments regarding the Environmental Source clusters	String	No

Arthropod Source Record

Variable	Label	Definition	Type	Mandatory
SourceSpecies	Arthropod Source Record Species	The arthropod species of the Arthropod Source Record. The arthropods of the Arthropod Source Record (one species) are also stratified by sex, age, and the females, if any, by condition class also	Single selection	Yes
ArthropodSourceRecordSpeciesIdentifiedBy	Arthropod Source Record Species Identified By	The person that makes the identification of the arthropod species	Single selection	No
SourceRecordAge	Arthropod Source Record Life Stage	A life stage category represented in the arthropods of the Arthropod Source Record. The arthropods of the corresponding species are also stratified by	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
		sex and the females, if any, by condition class also		
SourceSex	Arthropod Source Record Sex	A sex category represented in the arthropods of the Arthropod Source Record. The arthropods of the corresponding species are also stratified by age and the females, if any, by condition class also	Single selection	Yes
ArthropodSourceRecordCondition	Arthropod Source Record Condition	A condition category represented in the female arthropods of the Arthropod Source Record. The options include mixed, unfed, bloodfed, and gravid	Single selection	Yes
SourceRecordNumberAnimals	Arthropod Source Record Number of Arthropods	The number of arthropods in the corresponding sex, age, and condition category of the Arthropod Source Record	Integer	Yes
SourceRecordExactNumber	Arthropod Source Record Exact Number	Answer to the question: 'Is the number of arthropods reported in the current sex, age, and condition category of the Arthropod Source Record exact?'	Single selection	Yes

Arthropod Source Record - Clustering

Variable	Label	Definition	Type	Mandatory
ArthropodSourceRecordClusterCode	Arthropod Source Record Cluster Code	User-provided Arthropod Source Record Cluster Code	String	Yes

Variable	Label	Definition	Type	Mandatory
ArthropodSourceRecordClusterCrossReferenceID	Arthropod Source Record Cluster Cross Reference ID	The identifier of a cluster grouping Arthropod Source Records in another system (e.g., database/document/other)	String	No
ArthropodSourceRecordClusterCrossReferenceIDOrigin	Arthropod Source Record Cluster Cross Reference ID Origin	The database/document/other where other identification for the same cluster grouping Arthropod Source Records is used	String	No
ArthropodSourceRecordClusterType	Arthropod Source Record Cluster Type	The type of cluster (Spatial or Temporal)	Single selection	Yes
ArthropodSourceRecordClusterUnit	Arthropod Source Record Cluster Unit	The unit the cluster represents (e.g., a grid cell, a market, etc.)	String	Yes
ArthropodSourceRecordClusterComments	Arthropod Source Record Cluster Comments	Any other comments regarding the Arthropod Source clusters	String	No

Specimen

Variable	Label	Definition	Type	Mandatory
SpecimenID	Specimen	System-provided	Integer	System-assigned

Variable	Label	Definition	Type	Mandatory
SpecimenCode	Identifier	Specimen identifier	String	Yes
	Specimen Code	User-provided Specimen code		
	Specimen Cross Identifier	The identifier of an Specimen in another system (e.g., database/document/other)		
SpecimenCrossReferenceID	Specimen Cross Identifier	The identifier of an Specimen in another system (e.g., database/document/other)	String	No
SpecimenCrossReferenceIDOrigin	Specimen Cross Identifier Origin	The database/document/other where other identification for the same Specimen is used	String	No
SpecimenOriginType	Specimen Origin Type	A qualitative definition about the origin of the Specimen. 'Source Record' when the Specimen is coming from a single or multiple Source Records, 'Specimen' when the Specimen is coming from other Specimens including Pooled Specimens, and 'Diagnostic Product' if the Specimen comes from a Diagnostic Product	Multiple Selection	Yes
SpecimenOrigin	Specimen Origin	The Codes of the Source Records, Specimens, or Diagnostics involved in the origin of the current Specimen	Multiple Selection	Yes
SpecimenTissueType	Specimen Tissue Type	The type(s) of tissue in the Specimen. They include 'arthropod' if they are coming from an Arthropod Source Record and 'mixed' if there are several tissues	Single Selection	Yes
SpecimenCollectionMethod	Specimen Collection Method	The technique used to acquire the Specimen (e.g., swabbing, punching, venipuncture, bleeding)	Single Selection	Yes
SpecimenCreationDate	Specimen Creation Date	The date the Specimen is created	Date	Yes

Variable	Label	Definition	Type	Mandatory
SpecimenOriginalQuantity	Specimen Original Quantity	The original quantity of Specimen by the time it was created (e.g., 2)	Float	Yes
SpecimenOriginalQuantityUnit	Specimen Quantity Unit	The unit for the original quantity of the Specimen (e.g., milliliters, swab, mosquitoes)	Single selection	Yes
SpecimenMedium	Specimen Medium	The medium in which the Specimen is contained on (e.g. RNA-later)	Single selection	Yes
SpecimenMediumQuantity	Specimen Medium Quantity	The medium quantity in which the Specimen is contained on (e.g., 0.5)	Float	Yes
SpecimenMediumQuantityUnit	Specimen Medium Quantity Unit	The unit of the medium quantity in which the Specimen is contained on (e.g., milliliters)	Single selection	Yes
SpecimenFieldStorage	Specimen Field Storage	The method to store the specimen in the field while in transit to a proper facility	Single selection	Yes
SpecimenColdChainMaintained	Specimen Cold Chain Maintained	Answer to the question: 'Was the cold chain maintained during transit from the field to the laboratory?'	Boolean	Yes
SpecimenInSituStorageProblems	Specimen In Situ Storage Problems	Description of problems to store the Specimen in the field	String	No
SpecimenInContainer	Specimen in Container	Answer to the question: 'Is the Specimen sharing a container, as a jar, with other Specimens?'	Boolean	Yes
SpecimenContainerType	Specimen Container Type	The type of container the Specimens is sharing with other Specimens	Single selection	No
SpecimenContainerID	Specimen Container ID	The identifier of a container (e.g., a jar) where multiple Specimens are maintained together	String	Yes
SpecimenAvailable	Specimen	Answer to the question: 'Is	Boolean	Yes

Variable	Label	Definition	Type	Mandatory
	Available	the Specimen available to be used in Diagnostics or mix other Specimens?'		
SpecimenReasonNotAvailable	Specimen Reason Not Available	Description of the reason the Specimen is not available to be used in Diagnostics or to be mixed with other Specimens?'	String	Yes
SpecimenOwner	Specimen Owner	The owner of the Specimen (person or institution)	String	Yes
SpecimenComments	Specimen Comments	Any other comments regarding the Specimen	String	No

Storage

Variable	Label	Definition	Type	Mandatory
StorageChange	Storage Change	Answer to the question: 'Is this storage record a consequence of changes in the storage of the Carcass or Specimen?'	Boolean	Yes
StorageChangeDate	Storage Change Date	The date when the storage change occurred. If the change is associated with an Export, then this attribute is the date when the exported material was stored in the new facility	Date	Yes
StorageChangeReason	Storage Change Reason	Description of the reason to change the storage of the Carcass or Specimen	String	Yes
SpecimenCurrentQuantityStored	Specimen Current Quantity Stored	The quantity of Specimen currently stored (e.g., 0.3)	Float	Yes
SpecimenCurrentQuantityUnit	Specimen Current Quantity Unit	The unit of measurement for the reported quantity of Specimen currently stored (e.g., mililiters)	Single selection	Yes

Variable	Label	Definition	Type	Mandatory
SpecimenReasonQuantityDifference	Specimen Reason of Quantity Difference	Explanantion for the difference between the original Specimen amount and the current Specimen amount stored	String	Yes
StorageType	Storage Type	The type of storage of the Carcass or Specimen (e.g., in tank of liquid nitrogen, frozen, etc.)	Single selection	Yes
StorageFacilityStorage	Storage Facility	The facility where the Carcass or Specimen is stored	Single selection	Yes
StorageFacilityStorageContact	Storage Facility Contact	The person of contact in the facility where the Carcass or Specimen is stored	Single selection	Yes
StorageBuilding	Storage Building	The specific building within the facility where the Carcass or Specimen is stored	String	No
StorageRoom	Storage Room	The specific room within the facility building where the Carcass or Specimen is stored	String	No
StorageStorage	Storage Unit	The specific storage unit within the building room building where the Carcass or Specimen is stored (e.g., refrigerator 'X')	String	No
StorageShelf	Storage Shelf	The specific shelf within the storage unit where the Carcass or Specimen is stored	String	No
StorageRack	Storage Rack	The specific rack within the shelf where the Carcass or Specimen is stored	String	No
StorageBox	Storage Box	The specific box within the rack where the Carcass or Specimen is stored	String	No
StorageRow	Storage Row	The specific row within the box where the Carcass or Specimen is stored	Integer	No

Variable	Label	Definition	Type	Mandatory
StorageProblemsInFacility	Storage Problems in Facility	Description of any problems regarding the storage of Carcasses or Specimens within the facility	String	Yes
StorageProblemsInFacilityDate	Storage Problems in Facility Date	Date when any problems regarding the storage of Carcasses or Specimens within the facility occurred	Date	Yes
StorageComments	Storage Comments	Any other comments regarding the Storage	String	No

Export

Variable	Label	Definition	Type	Mandatory
ExportID	Export Identifier	System-provided Export identifier	Integer	System-assigned
ExportCode	Export Code	User-provided Export code	String	No
ExportCrossReferenceID	Export Cross Identifier	The identifier of an Export in another system (e.g., database/document/other)	String	No
ExportCrossReferenceIDOrigin	Export Cross Identifier Origin	The database/document/other where other identification for the same Export is used	String	No
ExportOrigin	Export Origin	The facility where the Carcass or Specimen depart from	Single selection	Yes
ExportPermits	Export Permits	Answer to the question: 'Does the exportation process requires any permit'?	Boolean	Yes
ExportQuantity	Export Quantity	The quantity of Carcass or Specimen exported	Float	Yes
ExportQuantityUnit	Export Quantity Unit	The unit for the quantity of Carcass or Specimen exported reported	Single selection	Yes
ExportDestination	Export	The destination of the	String	Yes

Variable	Label	Definition	Type	Mandatory
	Destination	Carcass or Specimen		
ExportDepartureDate	Export Departure Date	The date the Carcass or Specimen leaves the current store location to start the exportation process	Date	Yes
ExportStorageMethod	Export Storage Method	The method(s) used to keep the Carcass or Specimen properly maintained	Multiple selection	Yes
ExportStatus	Export Status	The current status of the exportation	Single selection	Yes
ExportTransitLocation	Export Transit Location	The current transit location of the exported Carcass or Specimen, if any	String	No
ExportTransitLocationContact	Export Transit Location Contact	A contact at the current transit location of the exported Carcass or Specimen	Single selection	No
ExportProblems	Export Problems	Description of any problems during the export of the Carcass or Specimen	String	No
ExportArrived	Export Arrived	Answer to the question: 'Have the exported Carcass or Specimen arrived to destination?'	Boolean	Yes
ExportArrivalDate	Export Arrival Date	The date the Carcass or Specimen arrived to their destination	Date	Yes
ExportReceivedBy	Export Received By	The person that receive the Carcass or Specimen at destnation	Single Selection	Yes
ExportComments	Export Comments	Any other comments regarding the Export	String	No

Diagnostic

Variable	Label	Definition	Type	Mandatory
DiagnosticID	Diagnostic Identifier	System-provided Diagnostic identifier	Integer	System-assigned
DiagnosticCode	Diagnostic Code	User-provided Diagnostic code	String	Yes
DiagnosticCrossReferenceID	Diagnostic Cross Identifier	The identifier of an Diagnostic in another system (e.g., database/document/other)	String	No
DiagnosticCrossReferenceIDOrigin	Diagnostic Cross Identifier Origin	The database/document/other where other identification for the same Diagnostic is used	String	No
DiagnosticTargetedHazardType	Diagnostic Targeted Hazard Type	The type health hazard targeted by the Diagnostic	Single selection	Yes
DiagnosticTargetedHazardName	Diagnostic Targeted Hazard Name	The name of the health hazard targeted by the Diagnostic	Single selection	No
DiagnosticType	Diagnostic Type	The type of method used to conduct the Diagnostic (e.g., 'molecular', 'serology', etc)	Single selection	Yes
DiagnosticMethod	Diagnostic Method	The method used to conduct the Diagnostic (e.g., 'agglutination', 'PCR', etc)	Single selection	Yes
DiagnosticName	Diagnostic Name	The name of the Diagnostic method	Single selection	Yes
DiagnosticMeasurementQuantitative	Diagnostic Measurement Quantitative	Answer to the question: 'Does the Diagnostic method provide a quantitative	Boolean	Yes

Variable	Label	Definition	Type	Mandatory
		result?'		
DiagnosticMeasurementQuantitativeUnit	Diagnostic Measurement Quantitative Unit	The quantitative unit usedd to report the results of the Diagnostic	Single selection	Yes
DiagnosticMeasurementQualitativeUnit	Diagnostic Measurement Qualitative Unit	The qualitative unit used to report the results of the Diagnostic	Single selection	Yes
DiagnosticRunInField	Diagnostic Run in the Field	Answer to the question: 'Is the Diagnostic run in the field?'	Boolean	Yes
DiagnosticRequestedBy	Diagnostic Requested By	The person requesting the Diagnostic	Single selection	No
LaboratoryName	Laboratory Name	The name of the Laboratory where the Diagnostic is completed	Single Selection	Yes
DiagnosticDateSentForTesting	Date Sent for Testing	The date the Animal Source, Carcass, or Specimen was sent to the Laboratory to be tested	Date	Yes
DiagnosticDateReceivedForTesting	Date Received for Testing	The date the Animal Source, Carcass, or Specimen was received in the Laboratory	Date	No
DiagnosticDate	Date Diagnostic Conducted	The date the Dieagnostics is conducted	Date	No
DiagnosticBy	Diagnostic By	The person that conducted the Diagnostic	Single selection	No
DiagnosticResultsReceived	Diagnostic Results Received	Answer to the question: 'Were the Diagnostic	Boolean	Yes

Variable	Label	Definition	Type	Mandatory
		results received?'		
DiagnosticDateResultsReceived	Date Results Received	The date the Diagnostic results were received by the requester	Date	No
DiagnosticResultQuantitative	Diagnostic Result	The result of the diagnostic on quantitative units	Float	Yes
DiagnosticResultQualitative	Diagnostic Result	The result of the diagnostic on qualitative units	String	Yes
DiagnosticResultModified	Diagnostic Result Modified	Answer to the question:'Have the Diagnostic results been modified?'	Boolean	Yes
DiagnosticDateResultModified	Date Diagnostic Result modified	The date when the Diagnostic result was modified	Date	Yes
DiagnosticReasonResultModified	Reason Diagnostic Result modified	Description of the reason the Diagnostic result was modified	String	Yes
DiagnosticPreviousResultQuantitative	Diagnostic Previous Result Quantitative	The Diagnostic quantitative result before modification	String	No
DiagnosticPreviousResultQualitative	Diagnostic Previous Result Qualitative	The Diagnostic quantitative result before modification	String	No
DiagnosticProblems	Diagnostic Problems	Description of any problems regarding the Diagnostic	String	No
DiagnosticIsRepetition	Diagnostic Is a Repetition	Answer to the question: 'Is the Diagnostic a repetition of another Diagnostic	Boolean	Yes
DiagnosticReasonRepeated	Diagnostic	Description of the	String	Yes

Variable	Label	Definition	Type	Mandatory
DiagnosticComments	Reason Repetition	reason the Diagnostic is repeated	String	No
	Diagnostic Comments	Any comments regarding the Diagnostic		
	Diagnostic Interpreted	Answner to the quessiton: 'In the diagnostic interpreted?'		

Diagnostic Product

Variable	Label	Definition	Type	Mandatory
DiagnosticProductID	Diagnostic Product Identifier	System-provided Diagnostic Product identifier	Integer	System-assigned
DiagnosticProductType	Diagnostic Product Type	The type of Diagnostic Product (e.g., 'cDNA')	Single selection	Yes

Laboratory

Variable	Label	Definition	Type	Mandatory
LaboratoryID	Laboratory Identifier	System-provided Project identifier	Integer	System-assigned
Laboratory Name	Laboratory Name	The name of the Laboratory	String	Yes
LaboratoryCrossReferenceID	Laboratory Cross Identifier	The identifier of the Laboratory under another nomenclature system. For example, in a different database or document where other identification for the same Laboratory is used	String	No
LaboratoryCrossReferenceIDOrigin	Laboratory Cross	The location/database/doc	String	No

Variable	Label	Definition	Type	Mandatory
Laboratory	Identifier Origin	Document where other identification for the same Laboratory is used		
	LaboratoryCountry	The country where the Laboratory is located	String	No
	LaboratoryAddress	The address of the Laboratory	String	No
	LaboratoryPhone	The phone number of the Laboratory	String	Yes
	LaboratoryEmail	The email address of the Laboratory	String	No
LaboratoryManager	LaboratoryManager	The manager of the Laboratory	String	No
	LaboratoryManagerEmail	The email address of the manager of the Laboratory	String	No
	LaboratoryPointContactName	The name of the best contact point for the Laboratory	Multiple selection	Yes
	LaboratoryPointContactEmail	The email address of the best contact point for the Laboratory	String	Yes
	LaboratoryPointContactAffiliation	The affiliation of the best contact point for the Laboratory	String	No
LaboratoryDiagnosticMethodAvailable	LaboratoryDiagnostics Available	The diagnostic methods available in the Laboratory	Multiple selection	Yes
	LaboratoryMaxBiosafetyLevel	The maximum biosafety level available in the Laboratory	Single selection	Yes
	LaboratoryCertification	The certifications accomplished by the Laboratory	Multiple selection	Yes
LaboratoryStorageCapacity	Laboratory	The capacity of the	String	Yes

Variable	Label	Definition	Type	Mandatory
LaboratoryDataManagementSystem	Storage Capacity	Laboratory to store Specimens and Carcasses	String	Yes
	Laboratory Data Information System	The information system used in the Laboratory to manage and track Diagnostic information		

Interpretation

Diagnostic Interpretation

Variable	Label	Definition	Type	Mandatory
DiagnosticInterpretation	Diagnostic Interpretation	The Interpretation of the diagnostic based on its results	Single selection	Yes
DiagnosticInterpretationDate	Diagnostic Interpretation Date	The date of the Diagnostic Interpretation	Date	No
DiagnosticInterpretationBy	Diagnostic Interpretation By	The person that made the Interpretation	Single selection	Yes
DiagnosticInterpretationBySector	Diagnostic Interpretation By Sector	The environmental, animal, or human health sector affiliation of the individual that made the Diagnostic Interpretation	Single selection	No
DiagnosticInterpretationComments	Diagnostic Interpretation Comments	Comments regarding the Diagnostic Interpretation	String	No

Specimen Interpretation

Variable	Label	Definition	Type	Mandatory
SpecimenInterpretationID	Specimen Interpretation ID	System-provided Specimen Interpretation	Integer	System-assigned

Variable	Label	Definition	Type	Mandatory
		identifier		
SpecimenInterpretationTargetedHazardType	Specimen Interpretation Targeted Hazard Type	The hazard type to be Interpreted with respect to its presence in the current Specimen	Single selection	Yes
SpecimenInterpretationTargetedHazardTypeName	Specimen Interpretation Targeted Hazard Type Name	The name of the hazard to be Interpreted with respect to its presence in the current Specimen	Single selection	Yes
SpecimenInterpretationConclusion	Specimen Interpretation Conclusion	The final Interpretation of the status of the targeted hazard in the Specimen based on the results of the corresponding Diagnostics	String	Yes
SpecimenInterpretationDate	Specimen Interpretation Date	The date of the Interpretation	Date	No
SpecimenInterpretationBy	Specimen Interpretation By	The person that made the Interpretation	Single selection	Yes
SpecimenInterpretationBySector	Specimen Interpretation By Sector	The environmental, animal, or human health sector affiliation of the individual that made the Specimen Interpretation	Single selection	No
SpecimenInterpretationBasedOn	Specimen Interpretation Based On	Description of the arguments leading to the Specimen Interpretation	String	Yes
SpecimenInterpretationComments	Specimen Interpretation	Comments regarding the	String	No

Variable	Label	Definition	Type	Mandatory
	Comments	Specimen Interpretation		
Source Record Interpretation				
Variable	Label	Definition	Type	Mandatory
SourceRecordInterpretationID	Source Record Interpretation ID	System-provided Source Record Interpretation identifier	Integer	System-assigned
SourceRecordInterpretationTargetedHazardTypeID	Source Record Interpretation Targeted Hazard Type	The hazard type to be Interpreted with respect to its presence in the current Source Record	Single selection	Yes
SourceRecordInterpretationTargetedHazardTypeName	Source Record Interpretation Targeted Hazard Type Name	The name of the hazard to be Interpreted with respect to its presence in the current Source Record	Single selection	Yes
SourceRecordInterpretationConclusion	Source Record Interpretation Conclusion	The final Interpretation of the status of the targeted hazard in the Source Record based on the results of the corresponding Diagnostics, Necropsy, and field findings	String	Yes
SourceRecordInterpretationDate	Source Record Interpretation Date	The date of the Interpretation	Date	No
SourceRecordInterpretationBy	Source Record Interpretation By	The person that made the Interpretation	Single selection	Yes
SourceRecordInterpretationBySector	Source	The	Single	No

Variable	Label	Definition	Type	Mandatory
SourceRecordInterpretationBasedOn	Record Interpretation By Sector	environmental, animal, or human health sector affiliation of the individual that made the Source Record Interpretation	selection	
	Source Record Interpretation Based On	Description of the arguments leading to the Source Record Interpretation	String	Yes
	Source Record Interpretation Comments	Comments regarding the Source Record Interpretation	String	No
